## Curved Monitor T55

### The curve champion

The leader in curved monitors. Samsung has led the curved monitor market since being the first to introduce the innovative displays to the world in 2015. With industry-leading technology in a full line-up, Samsung's curved monitors are consistently number one in market share.

※ Based on data from IDC Quarterly PC Monitor Tracker 2019, Q3.

### 1000R and eye comfort certificate

T55 received a high performance curved display (1000R) and eye comfort certificate from TÜV Rheinland.

※ Eye comfort certificate only applies to 24-inch and 27-inch monitors. In comparison to conventional monitors that have less curve, 1000R closely fits the human field of view for less eye strain. A clinical study at Seoul National University Hospital shows that the closer to 1000R, the more it limits eye fatigue.

### Minimalist design

Next-generation design. The virtually borderless display's striking aesthetic is enhanced by a fabric-textured backside and premium-quality slim metal stand. The result is a monitor that won't just catch eyes, but complements any interior, too.

### What gamers want

Welcome to your new playground. AMD FreeSync delivers seamless gaming, while 75Hz makes scenes smooth. This flawless imagery comes together with Game Mode and the renowned 1000R curve for intensely realistic immersion.

### Focused comfort

Protect your eyes and do more. The T55's advanced eye comfort technology reduces eye strain for more comfortable extended computing. Flicker Free technology continuously removes tiring and irritating screen flicker, while Eye Saver Mode minimizes emitted blue light. Your eyes stay fresh longer.

### Ready to entertain

Connect to all your favorite devices with a convenient HDMI, DP, and D-Sub triple interface. The built-in 5 Watt speakers make it even easier to get lost in your favorite movies or TV shows, without plugging in a speaker.

※ Built-in speakers only available on 27" and 32" models.
