Samsung Electronics owns the copyright for this manual.

Use or reproduction of this manual in parts or entirety without the authorization of Samsung Electronics is prohibited.

Microsoft, Windows are registered trademarks of Microsoft Corporation.

VESA, DPM and DDC are registered trademarks of the Video Electronics Standards Association.

Ownership of all other trademarks is attributed to their due owner.

• An administration fee may be charged if either
  - (a) an engineer is called out at your request and there is no defect in the product
     (i.e. where you have failed to read this user manual).
  - (b) you bring the unit to a repair centre and there is no defect in the product
     (i.e. where you have failed to read this user manual).

• The amount of such administration charge will be advised to you before any work or home visit is carried out.
Safety Precautions

Caution
RISK OF ELECTRIC SHOCK DO NOT OPEN

Caution: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER. (OR BACK) THERE ARE NO USER SERVICEABLE PARTS INSIDE. REFER ALL SERVICING TO QUALIFIED PERSONNEL.

⚠️ This symbol indicates that high voltage is present inside. It is dangerous to make any kind of contact with any internal part of this product.

⚠️ This symbol alerts you that important literature concerning operation and maintenance has been included with this product.

Symbols

Warning
A serious or fatal injury may result if instructions are not followed.

Caution
Personal injury or damage to properties may result if instructions are not followed.

Activities marked by this symbol are prohibited.

Instructions marked by this symbol must be followed.

Cleaning

Exercise care when cleaning as the panel and exterior of advanced LCDs are easily scratched.

Take the following steps when cleaning.

The following images are for reference only. Real-life situations may differ from what is shown in the images.

1. Power off the product and computer.

2. Disconnect the power cord from the product.

   Hold the power cable by the plug and do not touch the cable with wet hands. Otherwise, an electric shock may result.

3. Wipe the product with a clean, soft and dry cloth.

   - Do not use detergents that contain alcohol, solvent or surface-active agents.
   - Do not spray water or detergent directly on the product.

4. Wet a soft and dry cloth in water and wring thoroughly to clean the exterior of the product.

5. Connect the power cord to the product when cleaning is finished.

6. Power on the product and computer.
Storage
Due to the characteristics of high-glossy products, using a UV humidifier nearby may create white-coloured stains on the product.
— Contact Customer Service Centre if the inside of the product needs cleaning (service fee will be charged).

Electricity and Safety
— The following images are for reference only. Real-life situations may differ from what is shown in the images.

**Warning**

- Do not use a damaged power cord or plug, or a loose power socket.
  - An electric shock or fire may result.

- Do not use multiple products with a single power socket.
  - Overheated power sockets may cause a fire.

- Do not touch the power plug with wet hands. Otherwise, an electric shock may result.

- Insert the power plug all the way in so it is not loose.
  - An unsecure connection may cause a fire.

- Connect the power plug to a grounded power socket (type 1 insulated devices only).
  - An electric shock or injury may result.

- Do not bend or pull the power cord with force. Be careful not to leave the power cord under a heavy object.
  - Damage to the cord may result in a fire or electric shock.

- Do not place the power cord or product near heat sources.
  - A fire or electric shock may result.

- Clean any dust around the pins of the power plug or the power socket with a dry cloth.
  - A fire may result.
Caution

Do not disconnect the power cord while the product is being used.
• The product may become damaged by an electric shock.

Only use the power cord provided with your product by Samsung. Do not use the power cord with other products.
• A fire or electric shock may result.

Keep the power socket where the power cord is connected unobstructed.
• The power cord must be disconnected to cut off power to the product when an issue occurs.
• Note that the product is not completely powered down by using only the power button on the remote.

Hold the plug when disconnecting the power cord from the power socket.
• An electric shock or fire may result.

Installation

Warning

DO NOT PLACE CANDLES, INSECT REPELLENTS OR CIGARETTES ON TOP OF THE PRODUCT. DO NOT INSTALL THE PRODUCT NEAR HEAT SOURCES.
• A fire may result.

Have a technician install the wall-mount hanger.
• Installation by an unqualified person can result in an injury.
• Only use approved cabinets.

Do not install the product in poorly ventilated spaces such as a bookcase or closet.
• An increased internal temperature may cause a fire.

Install the product at least 10cm away from the wall to allow ventilation.
• An increased internal temperature may cause a fire.

Keep the plastic packaging out of the reach of children.
• Children may suffocate.
Do not install the product on an unstable or vibrating surface (insecure shelf, sloped surface, etc.)
- The product may fall and become damaged and/or cause an injury.
- Using the product in an area with excess vibration may damage the product or cause a fire.

Do not install the product in a vehicle or a place exposed to dust, moisture (water drips, etc.), oil, or smoke.
- A fire or electric shock may result.

Do not expose the product to direct sunlight, heat, or a hot object such as a stove.
- The product lifespan may be reduced or a fire may result.

Do not install the product within the reach of young children.
- The product may fall and injure children.
- As the front is heavy, install the product on a flat and stable surface.

Edible oil, such as soybean oil, can damage or deform the product. Do not install the product in a kitchen or near a kitchen counter.

Caution

Do not drop the product while moving.
- Product failure or personal injury may result.

Do not set down the product on its front.
- The screen may become damaged.

When installing the product on a cabinet or shelf, make sure that the bottom edge of the front of the product is not protruding.
- The product may fall and become damaged and/or cause an injury.
- Install the product only on cabinets or shelves of the right size.

Set down the product gently.
- Product failure or personal injury may result.

Installing the product in an unusual place (a place exposed to a lot of fine dust, chemical substances, extreme temperatures or a significant presence of moisture, or a place where the product will operate continuously for an extended period of time) may seriously affect its performance.
- Be sure to consult Samsung Customer Service Centre if you want to install the product at such a place.
Operation

Warning

There is a high voltage inside the product. Never disassemble, repair or modify the product yourself.
- A fire or electric shock may result.
- Contact Samsung Customer Service Centre for repairs.

Before moving the product, turn off the power switch and disconnect the power cable and all other connected cables.
- Otherwise, the power cord may be damaged and a fire or electric shock may result.

If the product generates abnormal sounds, a burning smell or smoke, disconnect the power cord immediately and contact Samsung Customer Service Centre.
- An electric shock or fire may result.

Do not let children hang from the product or climb on top of it.
- Children may become injured or seriously harmed.

If the product is dropped or the outer case is damaged, turn off the power switch and disconnect the power cord. Then contact Samsung Customer Service Centre.
- Continued use can result in a fire or electric shock.

Do not leave heavy objects or items that children like (toys, sweets, etc.) on top of the product.
- The product or heavy objects may fall as children try to reach for the toys or sweets resulting in a serious injury.

During a lightning or thunderstorm, power off the product and remove the power cable.
- A fire or electric shock may result.

Do not drop objects on the product or apply impact.
- A fire or electric shock may result.

Do not move the product by pulling the power cord or any cable.
- Product failure, an electric shock or fire may result from a damaged cable.

If a gas leakage is found, do not touch the product or power plug. Also, ventilate the area immediately.
- Sparks can cause an explosion or fire.

Do not lift or move the product by pulling the power cord or any cable.
- Product failure, an electric shock or fire may result from a damaged cable.
Do not use or keep combustible spray or an inflammable substance near the product.
  • An explosion or fire may result.

Ensure the vents are not blocked by tablecloths or curtains.
  • An increased internal temperature may cause a fire.

Do not insert metallic objects (chopsticks, coins, hairpins, etc) or objects that burn easily (paper, matches, etc) into the product (via the vent or input/output ports, etc).
  • Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product. Then contact Samsung Customer Service Centre.
  • Product failure, an electric shock or fire may result.

Do not place objects containing liquid (vases, pots, bottles, etc) or metallic objects on top of the product.
  • Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product. Then contact Samsung Customer Service Centre.
  • Product failure, an electric shock or fire may result.

Caution

Leaving the screen fixed on a stationary image for an extended period of time may cause afterimage burn-in or defective pixels.
  • Activate power-saving mode or a moving-picture screen saver if you will not be using the product for an extended period of time.

Disconnect the power cord from the power socket if you do not plan on using the product for an extended period of time (vacation, etc).
  • Dust accumulation combined with heat can cause a fire, electric shock or electric leakage.

Use the product at the recommended resolution and frequency.
  • Your eyesight may deteriorate.

Do not hold the product upside-down or move it by holding the stand.
  • The product may fall and become damaged or cause an injury.

Looking at the screen too close for an extended period of time can deteriorate your eyesight.

Do not use humidifiers or stoves around the product.
  • A fire or electric shock may result.
Rest your eyes for more than 5 minutes for every 1 hour of product use.
• Eye fatigue will be relieved.

Do not touch the screen when the product has been turned on for an extended period of time as it will become hot.

Store small accessories out of the reach of children.

Exercise caution when adjusting the product angle or stand height.
• Your hand or finger may get stuck and injured.
• Tilting the product at an excessive angle may cause the product to fall and an injury may result.

Do not place heavy objects on the product.
• Product failure or personal injury may result.

When using headphones or earphones, do not turn the volume too high.
• Having the sound too loud may damage your hearing.

Be careful that children do not place the battery in their mouths when removed from the remote control. Place the battery in a location that children or infants cannot reach.
• If children have had the battery in their mouths, consult your doctor immediately.

When replacing the battery, insert it with the right polarity (+, -).
• Otherwise, the battery may become damaged or it may cause fire, personal injury or damage due to leakage of the internal liquid.

Use only the specified standardized batteries, and do not use a new battery and a used battery at the same time.
• Otherwise, the batteries may be damaged or cause fire, personal injury or damage due to a leakage of the internal liquid.

The batteries (and rechargeable batteries) are not ordinary refuse and must be returned for recycling purposes. The customer is responsible for returning the used or rechargeable batteries for recycling.
• The customer can return used or rechargeable batteries to a nearby public recycling centre or to a store selling the same type of the battery or rechargeable battery.
Preparations

Checking the Components

Components

- Contact the vendor where you purchased the product if any components are missing.
- The appearance of the components and items sold separately may differ from the image shown.
- A stand is not provided with the product. To install a stand, you can purchase one separately.

<tr>
<td><img src="image" alt="Power button" /></td>
<td>Power on the product. If you press the button when the product is turned on, the control menu will be displayed. To exit the OSD menu, press and hold the panel key for at least one second.</td>
</tr>
<tr>
<td><img src="image" alt="Menu button" /></td>
<td>Move to the upper or lower menu. You can also adjust the value of an option.</td>
</tr>
<tr>
<td><img src="image" alt="Volume button" /></td>
<td>Move to the left or right menu. You can adjust the volume by moving the panel key left or right when the control menu is not displayed.</td>
</tr>
</tbody>
</table>
If you press the button on the panel key when the product is turned on, the control menu will be displayed.

<table>
<thead>
<tr>
<th>Buttons</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Source</strong></td>
<td>Select the connected input source. Move the panel key right to select Source in the control menu. When the list of input sources is displayed, move the panel key left or right to select the desired input source. Next, press the panel key.</td>
</tr>
<tr>
<td><strong>MENU</strong></td>
<td>Display the OSD menu. Move the panel key left to select menu in the control menu. The OSD control screen will appear. Move the panel key right to select the desired menu. You can select a sub-menu item by moving the panel key up, down, left, or right. To change settings, select the desired menu and press the panel key.</td>
</tr>
<tr>
<td><strong>Home</strong></td>
<td>Enter Home mode. Move the panel key up to select Home in the control menu.</td>
</tr>
<tr>
<td><strong>Power off</strong></td>
<td>Power off the product. Move the panel key down to select Power off in the control menu. Next, press the panel key.</td>
</tr>
<tr>
<td><strong>Return</strong></td>
<td>Exit the control menu.</td>
</tr>
</tbody>
</table>
External sensor KIT

The external sensor is integrated with the remote control sensor, light sensor and power indicator. If mounting the display onto a wall, you can move the External sensor KIT to the side of the display.

The colour and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

The OM**D-K model does not come with a BACK-COVER.

### Parts

<table>
<thead>
<tr>
<th></th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Light sensor</td>
</tr>
<tr>
<td>2</td>
<td>Remote Control Sensor</td>
</tr>
<tr>
<td>3</td>
<td>Power indicator</td>
</tr>
</tbody>
</table>

Use the remote control within 7m to 10m from the sensor on the product at an angle of 30° from the left and right.

Store used batteries out of reach of children and recycle.

Do not use a new and used battery together. Replace both batteries at the same time.

Remove batteries when the remote control is not to be used for an extended period of time.

If you disconnect the power cord from the product while it is in standby mode, the product remains in standby mode until it runs out of power. The power indicator turns on or blinks during this time. If you reconnect the power cord, the input source activates and the product resumes normal operation.
**Reverse Side**

The colour and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

The OM*D-K model does not come with a BACK-COVER.

Anti-theft Lock

An anti-theft lock allows you to use the product securely even in public places.

The locking device shape and locking method depend on the manufacturer. Refer to the user guide provided with your anti-theft locking device for details.

The following images are for reference only. Real-life situations may differ from what is shown in the images.

**To lock an anti-theft locking device:**

1. Fix the cable of your anti-theft locking device to a heavy object such as a desk.
2. Put one end of the cable through the loop on the other end.
3. Insert the locking device into the anti-theft lock slot at the back of the product.
4. Lock the locking device.

- An anti-theft locking device can be purchased separately.
- Refer to the user guide provided with your anti-theft locking device for details.
- Anti-theft locking devices can be purchased at electronics retailers or online.

Spacer logo

Do not pull on the spacer logo using force. The logo may tear or break off.
Remote Control

- Using other display devices in the same space as the remote control of this product can cause the other display devices to be inadvertently controlled.
- A button without a description in the image below is not supported on the product.

Remote control button functions may differ for different products.
- Remove batteries when the remote control is not to be used for an extended period of time.
- Using other display devices in the same space as the remote control of this product can cause the other display devices to be inadvertently controlled.
- Buttons without descriptions in the image are not supported.

Power on the product.

Power off the product.

Number buttons
Enter the password in the OSD menu.

Adjust the volume.

Mute the sound.
Unmuting the sound: Press MUTE again or press the volume control (+ VOL -) button.

Change the input source.

Display or hide the onscreen display menu, or return to the previous menu.

Go to Home Launch Button.

Use this hotkey to directly access MagicInfo.
The hotkey works if the network box is connected.
Display information about the current input source.

Move to the upper, lower, left or right menu, or adjust an option’s setting.

Confirm a menu selection.

Exit the current menu.

Manually select a connected input source from PC, DVI, HDMI, or DisplayPort.

It sets safe lock function.

Used in Anynet+ mode and multimedia mode.

Quickly select frequently used functions.

Return to the previous menu.

If multiple products are connected through the Video Wall feature, press the SET button and enter a product ID using the number buttons. Control the product using the remote control.

Cancel a value that has been set using the SET button and control all connected products using the remote control.

To place batteries in the remote control

- Remote control button functions may differ for different products.
Connection Using an IR Stereo Cable (sold separately)

Make sure to connect the External ambient sensor while the product is powered off. Then, power on the product.

**Controlling more than one display product using your remote control**

- Connect the IR OUT port on the product to the CONTROL IN port on the other display product using the dedicated stereo cable.
- A command sent from the remote control pointed at product 1 will be received by both display products 1 and 2.

---

The appearance may differ depending on the product.

**Controlling more than one display product using an External ambient sensor (sold separately)**

- A command sent from the remote control pointed at product 1 (to which the External ambient sensor is connected) will be received by both display products 1 and 2.

---

The appearance may differ depending on the product.
Before Installing the Product
(Installation Guide)

To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation instructions.
- Ensure that an authorized installation company installs the wall mount.
- Otherwise, it may fall and cause personal injury.
- Make sure to install the specified wall mount.

Switching between portrait and landscape

Contact Samsung Customer Service Centre for further details.
- To use the product in portrait orientation, rotate it clockwise.

Ventilation

**Installation on a Perpendicular Wall**

- Minimum 40 mm
- Ambient temperature: Under 35°C
- When installing the product on a perpendicular wall, allow at least 40 mm of space between the product and wall surface for ventilation and ensure that the ambient temperature is kept below 35°C.
**Installation on an Indented Wall**

Contact Samsung Customer Service Centre for further details.

**Plane view**

- **A** Minimum 40 mm
- **B** Minimum 70 mm
- **C** Minimum 50 mm
- **D** Minimum 50 mm
- **E** Ambient temperature: Under 35°C

When installing the product on an indented wall, allow at least the space specified above between the product and wall for ventilation and ensure that the ambient temperature is kept below 35°C.

## Installing the Wall Mount

### Preparing before installing Wall-Mount

To install a wall-mount from another manufacturer, use the Holder-Ring.

### Installing the Wall Mount

The wall mount kit (sold separately) allows you to mount the product on the wall. For detailed information on installing the wall mount, see the instructions provided with the wall mount. We recommend you contact a technician for assistance when installing the wall mount bracket. Samsung Electronics is not responsible for any damage to the product or injury to yourself or others if you elect to install the wall mount on your own.
Wall Mount Kit Specifications (VESIA)

- Install your wall mount on a solid wall perpendicular to the floor. Before attaching the wall mount to surfaces other than plaster board, please contact your nearest dealer for additional information.
- If you install the product on a slanted wall, it may fall and result in severe personal injury.
- Samsung wall mount kits contain a detailed installation manual and all parts necessary for assembly are provided.
- Do not use screws that are longer than the standard length or do not comply with the VESA standard screw specifications. Screws that are too long may cause damage to the inside of the product.
- For wall mounts that do not comply with the VESA standard screw specifications, the length of the screws may differ depending on the wall mount specifications.
- Do not fasten the screws too firmly. This may damage the product or cause the product to fall, leading to personal injury. Samsung is not liable for these kinds of accidents.
- Samsung is not liable for product damage or personal injury when a non-VESA or non-specified wall mount is used or the consumer fails to follow the product installation instructions.
- Always have two people mount the product on a wall.
- Standard dimensions for wall mount kits are shown in the table below.

<table>
<thead>
<tr>

</table>

- Do not install your Wall Mount Kit while your product is turned on. It may result in personal injury due to electric shock.
Connecting and Using a Source Device

Before Connecting

Pre-connection Checkpoints

— Before connecting a source device, read the user manual provided with it. The number and locations of ports on source devices may differ from device to device.
— Do not connect the power cable until all connections are completed. Connecting the power cable during connection may damage the product.
— Connect the sound ports correctly: left = white and right = red.
— Check the types of ports at the back of the product you want to connect.

Connecting to a PC

• Do not connect the power cable before connecting all other cables. Ensure you connect a source device first before connecting the power cable.
• A PC can be connected to the product in a variety of ways. Select a connection method suitable for your PC.

Connection using the D-SUB cable (Analogue type)

The OM**D-K model does not have internal speakers. To enable audio, connect an external sound output device to the AUDIO OUT port.
Connection using a DVI cable (Digital type)

The OM**D-K model does not have internal speakers. To enable audio, connect an external sound output device to the AUDIO OUT port.

Connection Using an HDMI-DVI Cable

After connecting a computer to the product with an HDMI-DVI cable, make sure to configure the settings as shown below to enable the video and audio from the computer.

- **Sound** → set HDMI Sound to PC(DVI)
- **Picture** → set each screen mode to **Text** under **Picture Mode**
- **System** → **General** → set HDMI Hot Plug to Off
The OM**D-K model does not have internal speakers. To enable audio, connect an external sound output device to the **AUDIO OUT** port.

**Connection Using an HDMI Cable**

**Connection Using an DP Cable**

- Precautions for using DP
  - To increase the standby power capacity, the product stops DP communication when it is turned off or in power-saving mode. If the product in dual monitor mode is turned off or goes into power-saving mode, monitor setting changes may not be updated. As a result, screen output may not be displayed properly. In the occurrence of this issue, set **Max. Power Saving** to **Off** before using the product.
  - Some graphics cards that are not compliant with the DP standard may prevent the Windows Booting/Bios screen from being displayed when the product is in power-saving mode. If this is the case, make sure to turn on the product first before turning on your PC.
  - The DisplayPort interface (**DP IN**) on the product and the provided DP cable are designed based on the VESA standards. Using a DP cable that is not VESA compliant may cause the product to function improperly. Samsung Electronics shall not be held responsible for any issues from using a cable that is not VESA compliant. Make sure to use a DP cable that is VESA compliant.
  - The OM**D-K model does not have internal speakers. To enable audio, connect an external sound output device to the **AUDIO OUT** port.
Connecting to a Video Device

- Do not connect the power cable before connecting all other cables. Ensure you connect a source device first before connecting the power cable.
- You can connect a video device to the product using a cable.
  - Connecting parts may differ in different products.
  - Press the SOURCE button on the remote control to change the source.

Connection Using the AV Cable

The OM**D-K model does not have internal speakers. To enable audio, connect an external sound output device to the AUDIO OUT port.

Connection Using the component Cable

The OM**D-K model does not have internal speakers. To enable audio, connect an external sound output device to the AUDIO OUT port.
Connection Using an HDMI-DVI Cable

Audio will not be enabled if the product is connected to a video device using an HDMI-DVI cable. To resolve this, additionally connect an audio cable to the audio ports on the product and video device.

After connecting a video device to the product with an HDMI-DVI cable, make sure to configure the settings as shown below to enable the video and audio from the video device.

- Sound → set HDMI Sound to PC(DVI)
- Picture → set each screen mode to Text under Picture Mode
- System → General → set HDMI Hot Plug to Off

Supported resolutions include 1080p (50/60Hz), 720p (50/60Hz), 480p, and 576p.

Connection Using an HDMI Cable

Using an HDMI cable or HDMI to DVI Cable (up to 1080p)

- For better picture and audio quality, connect to a digital device using an HDMI cable.
- An HDMI cable supports digital video and audio signals, and does not require an audio cable.
  - To connect the product to a digital device that does not support HDMI output, use an HDMI-DVI and audio cables.
- The picture may not display normally (if at all) or the audio may not work if an external device that uses an older version of HDMI mode is connected to the product. If such a problem occurs, ask the manufacturer of the external device about the HDMI version and, if out of date, request an upgrade.
- Be sure to use an HDMI cable with a thickness of 14 mm or less.
- Be sure to purchase a certified HDMI cable. Otherwise, the picture may not display or a connection error may occur.
- A basic high-speed HDMI cable or one with ethernet is recommended. This product does not support the ethernet function via HDMI.

The OM**D-K model does not have internal speakers. To enable audio, connect an external sound output device to the AUDIO OUT port.
Connecting to an Audio System

Connecting parts may differ in different products.

Connecting the LAN Cable

Connecting parts may differ in different products.

- Use Cat.7 (*STP Type) cable for the connection.
  *Shielded Twist Pair
Connecting the network box (Sold separately)

The OM**D-K model does not come with a BACK-COVER.

**OM46D**
**OM55D**

Connect network boxes to the indicated areas

**OM75D**
Installing the Network Box

- The appearance may differ depending on the product.
- For details on how to connect to a network box, refer to the user's manual provided with the network box upon purchase.

1. Lay a soft blanket on the ground for protection. Next, place the product with the front facing down onto the blanket.

2. Unfasten the screws and remove the cover.

3. Insert the network box in the direction of the arrow.

4. Fasten the network box using the screws.
Connecting the Power

Network boxes are sold separately.

1. Connect the power cables from the product and network box to the power outlet.

2. Turn on the power switch.
MagicInfo

To use MagicInfo, a network box (sold separately) must be connected to the product.

- To change the MagicInfo settings, run "MagicInfoSetupWizard" on the desktop.
- For details on how to use MagicInfo, refer to the DVD provided with the network box.
- The information in this section is subject to change without notice for quality improvement.
- If a problem occurs after installing an operating system other than the one provided with the network box, restoring the previous version of the operating system, or installing software that is not compatible with the operating system provided, you will not be able to benefit from technical support and will be charged a fee for a visit from a service technician. A product exchange or refund will also not be available.

Entering MagicInfo mode

1. After installing and connecting the network box (sold separately) to the product, power on the product.
2. Press SOURCE on the remote control, and select MagicInfo.
   - Connecting the network box to the DVI IN (MAGICINFO) port on the product will change Source from DVI to MagicInfo.
3. Select the default application you want to run when MagicInfo starts.
4. Enter the IP information.

5. Select a language. (The default language is English.)

6. Select a display mode.

7. Double-check the settings you have just configured.

If the execution icon does not appear, double-click the MagicInfo icon on the desktop. The icon will appear at the bottom right of the screen.
Changing the Input source

Source

SOURCE → Source

**Source** allows you to select a variety of sources and change source device names.

You can display the screen of a source device connected to the product. Select a source from source list to display the screen of the selected source.

— The input source can also be changed by using the SOURCE button on the remote control.

— The screen may not display correctly if an incorrect source is selected for the source device you want to convert to.

— To view detailed information about connected source devices, press the TOOLS button from the Source page.

**Edit Name**

SOURCE → Source → TOOLS → Edit Name → ENTER

Customize the name of a connected external device.

— The list can include the following source devices. Source devices on the list differ depending on the selected source.  
  - PC / Cable STB / Satellite STB / PVR STB / Game / Blu-ray / DVD / VCR / AV Receiver / Camcorder / DVI PC / DVI Devices / TV / IPTV / HD DVD / DMA

**Information**

SOURCE → Source → TOOLS → Information → ENTER

You can see detailed information about the selected external device.

— The displayed image may differ depending on the model.
Using MDC

Multiple display control "MDC" is an application that allows you to easily control multiple display devices simultaneously using a PC.
- For details on how to use the MDC programme, refer to Help after installing the programme. The MDC programme is available on the website.

MDC Programme Installation/Uninstallation

Installation

MDC installation can be affected by the graphics card, mother board and network conditions.
1. Click the MDC Unified installation programme.
2. Select a language for installation. Next, click "OK".
3. When the "Welcome to the InstallShield Wizard for MDC_Unified" screen appears, click "Next".
4. In the "License Agreement" window displayed, select "I accept the terms in the license agreement" and click "Next".
5. In the displayed "Customer Information" window, fill out all the information fields and click "Next".
6. In the displayed "Destination Folder" window, select the directory path you want to install the programme in and click "Next".
7. In the displayed "Ready to Install the Program" window, check the directory path to install the programme in and click "Install".
8. Installation progress will be displayed.
9. Click "Finish" in the displayed "InstallShield Wizard Complete" window.
   - Select "Launch MDC Unified" and click "Finish" to run the MDC programme immediately.
10. The MDC Unified shortcut icon will be created on the desktop after installation.
   - The MDC execution icon may not be displayed depending on the PC system or product specifications.
   - Press F5 if the execution icon is not displayed.

Uninstallation

1. Select Settings > Control Panel on the Start menu and double-click Add/Delete Program.
2. Select MDC Unified from the list and click Change/Remove.
Connecting to MDC

Using MDC via RS-232C (serial data communications standards)

An RS-232C serial cable must be connected to the serial ports on the PC and monitor.
Using MDC via Ethernet

Enter the IP for the primary display device and connect the device to the PC. Display devices can be connected to each other using a LAN cable.

**Connection using a direct LAN cable**

Multiple products can be connected using the **RJ45** port on the product and the LAN ports on the HUB.
Connection using a cross LAN cable

Multiple products can be connected using the RS232C IN / OUT port on the product.
Home feature

This feature is provided in Support → Go to Home. Accessible using the HOME button on the remote control.

Player

HOME ➔ Player ➔ ENTER ➔

To use the Player feature, set Play via to MagicInfo in System.

Play a range of content such as channels with schedules assigned, templates or files.

Play channels or content using any of the following methods.

- **Network Channel**: Play content using the server.
  - To run Network Channel, make sure the product is connected to the server.
- **Local Channel**: Play content in internal memory or from external memory.

The displayed image may differ depending on the model.
Approving a connected device from the server

• Set MagicInfo Mode to MagicInfo in Server Network Settings. Approach and use the MagicInfo server now.

First configure the server Network Settings before device approval.

1. Access the server you have assigned to your device.

2. Enter your ID and password to log in.

3. Select Device from the top menu bar.

4. Select MagicInfo from the menus on the left.

5. Select Unapproved from the sub-menus of MagicInfo.

6. Select the Approve button for your device from the list of unapproved MagicInfo devices.
7 Enter the information required to approve the device.

- **Device Name**: Enter the device name.
- **Device Group**: Select to specify the group.
- **Location**: Enter the current location of the device.

Pressing the **INFO** button on the remote when a network schedule is running will display the details of the schedule. Check that the correct device has been selected by viewing the device ID in the details.

8 Select the **All** menu to check that the device has been registered.

9 When the device is approved by the server, the schedule registered in the selected group will be downloaded to the device. The schedule will run after it is downloaded.

- For further details on how to configure a schedule, refer to the **MagicInfo Server user’s manual**.
- If a device is deleted from the list of devices approved by the server, the device will reboot to reset its settings.

### Setting the current time

A schedule may not run if the time set on the device is different from the server’s current time.

1 Go to the tabs **Device → Time**.

2 Select your device.

3 Select **Clock Set**, and sync the time with the server.

- When connecting to the server for the first time, the time on the product is set using the GMT time of the region where the server is installed.
- The time on the product can be changed from the server as shown in step 3.
- Turning the product off and then on again will restore the time setting on the product to the last time that was set from the server.

- For further details on how to manage the time (scheduling, holiday management, etc.), refer to the **MagicInfo Server user’s manual**.
Network Channel

Play content, templates and schedules configured on the server.

- You can view whether the server is connected (approval) in the Player menu screen.
  To view whether the server is connected when a Network Channel is running, press INFO on the remote.

1. Select Network Channel from the Player menu.
2. Network Channel will run.

Local Channel

Play a schedule or channel that was configured in the product.

1. Select Local Channel from the Player menu.

- The No channels message appears if no channel has been registered in Local Channel.

2. Local Channel will run.

My Templates

Play a template in My Templates stored in the internal memory of the product.
Available features in the Player page

The Player list page provides the following features.

• **Device**
  Select either **Internal** or **USB** to search for a desired device list.
  - All / Internal / USB

• **Contents**
  Select a content type as criterion to search for a desired content list.
  - All / Video / Image / PDF / Flash / Office / My Templates

• **Sort by**
  Specify the content sort criterion.
  - File Name / Recently played

• **Options**

**Menu items in the Player page**

Player page Settings menu

Settings

Aspect Ratio
Set Aspect Ratio to either Original or Full.

- Full / Original
  - This feature is only available for Videos, Images, PDF and Office files.

Display Duration
Set the duration for each page in a slideshow.

- This feature is only available for Images, PDF, Flash and Office files.

Transition Effect
Configure transition effects between pages or scenes in a slideshow or video file.

- None / Fade1 / Fade2 / Blind / Spiral / Checker / Linear / Stairs / Wipe / Random
  - This feature is only available for Images files.

Content Orientation
Switch the orientation of playing content to Landscape or Portrait mode.

- Landscape / Portrait
  - If Content Orientation is Portrait view, it does not support VP8 video codec.
  - Source is not available when Content Orientation is set to Portrait

Safely Remove USB Device
Safely removes USB memory

Reset Settings
Restore all the values under Settings to the default when the product was purchased.

— The displayed image may differ depending on the model.
When Content is Running

Viewing the details of the content that is running

Press the **INFO** button on the remote control.

- **Type**: Type of channel currently playing
  — Only applicable during Network Channel / Local Channel playback.
- **CH Number**: Number assigned to the channel currently playing
  — Only applicable during Network Channel / Local Channel playback.
- **CH Name**: Name of the channel currently playing
  — Only applicable during Network Channel / Local Channel playback.
- **Software Version**: Displays the software version of a device
- **MAC ID**: Displays the original identification number of a device
- **Tags**: Tag settings assigned to a device from the server
- **Server**: Displays the connection status (Connected, Disconnected or Not connected) of the server
- **USB**: Displays the connection status of a USB device
- **Storage for Network Channel**: View the location where content is saved.
- **Schedule download**: Displays the progress of a network schedule being downloaded from the server

---

The displayed image may differ depending on the model.
Changing the settings for the content that is running

Press the **TOOLS** button on the remote control during content playback to configure settings such as **Picture Mode** and **Sound Mode**.

- **Playlist**
  View a list of content items currently playing.

- **Music**
  Set the background music for the content currently playing.

- **Picture Mode**
  Customizes the screen settings for the content currently playing
  - Shops & Malls / Offices & Schools / Terminals & Stations / Video Wall / Calibration

- **Sound Mode**
  Customizes the audio settings for the content currently playing
  - Standard / Music / Movie / Clear Voice / Amplify

- **Repeat**
  Set the repeat mode.
  - One / All

- The displayed image may differ depending on the model.
- This feature is not available when content is playing through Video Wall.
File Formats Compatible with Player

- Supported file systems include FAT32 and NTFS.
- A file with a vertical and horizontal resolution larger than the maximum resolution cannot be played. Check the vertical and horizontal resolution of the file.
- Check the supported video and audio Codec types and Versions.
- Check the supported file versions.
  - Flash version up to 10.1 is supported
  - PowerPoint version up to 97 – 2007 is supported
- Only the last USB device that was connected is recognized.

Network Schedule Multiframe

Playback restrictions

- A maximum of two video files (Videos) can be played simultaneously.
- In portrait playback mode, only one video file can be played at a time.
- More than one Flash file cannot be played.
- For Office files (PPT and Word files) and PDF files, only one file type is supported at a time.
- LFD(.lfd) files are not supported.

Sound output restrictions

- More than one sound output cannot be used.
- Playback priority: Flash file > network BGM > local BGM > video file in the main frame selected by the user

Template files and LFD(.lfd) files

Restrictions

- Ensure a distributed folder (content / schedules) exists in Internal / USB memory.

Playback restrictions

- A maximum of two video (Videos) files can be played.
- More than one Flash file cannot be played.
- For Office files (PPT and Word files) and PDF files, only one file type is supported at a time.
- Multiple videos (Videos) cannot be played on a single display of a video wall simultaneously.

Sound output restrictions

- More than one sound output cannot be used.
- Playback priority: Flash file > network BGM > local BGM > video file in the main frame selected by the user

<td>Delete schedules.</td>
</tr>
<tr>
<td><strong>Settings</strong></td>
<td>The default content plays on a channel that does not contain programme information.</td>
</tr>
</tbody>
</table>
Configuring channel schedules

Play media content such as videos, photos and music at a desired time.

1. Select a channel to configure.
2. Select video, music and photo content you want to apply to the channel schedule.
3. Set the time to play the schedule. *(Start Time ~ Stop Time)*
4. Change the channel schedule name, and then select a destination folder to save to.
5. Press the **Save** button.

--- Only applicable when **Type** is set to **Local**.

Editing a channel schedule.

Change settings for a configured channel schedule such as content, the duration and the schedule name.

1. Select a channel to edit.
2. Select video, photo or music content to edit in the channel schedule.
   - Deleting content: Place the cursor over the desired content and then press the **x** button to delete it.
   - Move to the far right end of the content list. Click the **+** button to add content or change the playback order of content items.
3. Set the time to play the schedule. *(Start Time ~ Stop Time)*
4. Change the channel schedule name, and then select a destination folder to save to.
5. Press the **Save** button.

--- Only applicable when **Type** is set to **Local**.
Available features in the Template page

Create unique content using templates. It is easy to create content. Simply change images and text in a template.

Sort the template list using the following criteria.

- **Market**
- **Orientation**
  - **Landscape**: Select this mode when using the product in landscape orientation.
  - **Portrait**: Select this mode when using the product in portrait orientation.

1. Select a template from the provided sample templates.
Organize a template by inserting text, video, photo, or PDF files as desired.

**Entering text**

Select the Edit Text window to enter text.

**Font options**

- **Font Size**: Set the font size for messages. Use the VOL key to adjust the font size.
- **Font Colour**: Specify the text colour for the message.
- **Background Colour**: Specify the background colour for the message.
- **Background opacity**: Specify the background transparency for the message.
- **Alignment**: Select a message alignment mode.
- **Scroll**: Specify the scroll direction/speed for the message.
- **Hide Element**: Display or hide a message.
  - Selecting **Hide** does not reset the message settings.
- **Reset**: Reset all settings in Font options to default settings.

**Inserting content such as videos, photos and PDF files**

**Configuring the background image/background music**
New town interior design
Sustainable evolution unfolds tomorrow's design

1. Preview the created template using the Preview feature.
2. To save the template, press the Save button.
3. Configure Template Name and Storage.
4. Press the Save button to finish creating the content.
Export the product settings to a USB device or load the settings via a USB device. This option is useful when assigning the same settings to several products.

**When USB does not contain a duplicate file**

1. Connect the USB device to a USB port. Run the Clone Product function.
2. The No cloning file found on the USB device. Copy system settings from this product to the USB storage device? message appears.

**When USB contains a duplicate file**

1. Connect the USB device to a USB port. Run the Clone Product function.
2. The Cloning file found. Please select an option. message appears.
   - Run the Clone From USB or Clone to USB function.
     - Clone From USB: Apply the USB device settings to the product.
     - Clone to USB: Copy the product settings to the USB device.
   - After configuration is complete, the product is rebooted automatically.
Assign an ID to a set.
Press ▲/▼ to select a number, and press ENTER.

Device ID
Enter the ID number of the product connected to the input cable for input signal reception. (Range: 0~224)
- Enter the number you want using the number buttons on the remote control.

PC Connection Cable
Select a method to connect to MDC to receive the MDC signal.
- RS232C cable
  Communicate with MDC via the RS232C-stereo cable.
- RJ45(LAN) cable
  Communicate with MDC via the RJ45 cable.

Device ID Auto Set
This feature automatically allots an ID number to a device connected via an RS232C cable.
Video Wall

Customize the layout of multiple displays that are connected to form a video wall. In addition, display part of a whole picture or repeat the same picture on each of the connected multiple displays.

To display multiple images, refer to MDC Help or the MagicInfo user guide. Some models may not support the MagicInfo function.

Apply to

- **Current Source** (screen output from a device connected to Source): Configure videowall features for the screen output from an external device connected to the product.
- **MagicInfo Player S**: Configure videowall features for content saved in the product or content saved on a USB memory or SD card.

Restrictions

Playback may be initially choppy if video files of different resolutions play successively (i.e., 1280x720 content plays after 1920x1080 content) or an image file and a video file play one after the other.

Video Wall

You can activate or deactivate Video Wall.
To organize a video wall, select On.

- Off / On

**Horizontal x Vertical**

This feature automatically splits a videowall display based on a videowall matrix configuration.
Enter the videowall matrix.
The videowall display is split based on the configured matrix. The number of vertical or horizontal display devices can be set within the range 1 and 15.

- A videowall display can be split into a maximum of 225 screens.
- The Horizontal x Vertical option is only enabled when Video Wall is set to On

**Screen Position**

To rearrange split screens, adjust the number for each product in the matrix using the Screen Position feature.
Selecting Screen Position will display the videowall matrix with the numbers assigned to the products that form the videowall.

To rearrange products, use the direction buttons on the remote control to move a product to another desired number. Press the button.

- All Displays: Assign screen positions to All displays. Then, you don't need to set up video wall for individual displays.
- Current Displays: Only Assign screen position for this first display.

- Screen Position can be set up with a maximum of 15x15 split screens (225 devices). If connected using DP Loopout mode, the maximum number of devices changes to 100.
- The Screen Position option is only enabled when Video Wall is set to On.
- To use the function, make sure Horizontal x Vertical is configured.

**Format**

Select how to display images on the videowall display.

- Full: Display images in full screen with no margin.
- Natural: Display images in the original aspect ratio without enlarging or reducing the size.

- The Format option is only enabled when Video Wall is set to On.
Network Status

Check the current network and Internet connection.

- The displayed image may differ depending on the model.
Select a picture mode (Picture Mode) suitable for the environment where the product will be used.

- **Shops & Malls**
  Suitable for shopping malls.
  - Select either Videos/Images or Text depending on the picture mode.

- **Offices & Schools**
  Suitable for offices and schools.
  - Select either Videos/Images or Text depending on the picture mode.

- **Terminals & Stations**
  Suitable for bus terminals and train stations.
  - Select either Videos/Images or Text depending on the picture mode.

- **Video Wall**
  Suitable for environments where videowall display are used.
  - Select either Videos/Images or Text depending on the picture mode.

- **Calibration**
  In this mode, the brightness, colour, gamma and uniformity settings customized using the colour calibration programme Advanced Colour Management are applied.
  - To apply the Calibration mode properly, make sure you configure the picture quality settings, such as brightness, colour, gamma and uniformity, using the colour calibration programme Advanced Colour Management.
  - For more information on the Advanced Colour Management programme, contact the dealer you purchased the product from.

The displayed image may differ depending on the model.
On/Off Timer

You must set the clock before you can use On/Off Timer.

On Timer

Set On Timer so that your product turns on automatically at a time and on a day of your choosing.
The power is turned on with the specified volume or input source.

**On Timer**: Set the on timer by making a selection from one of the seven options. Ensure you set the current time first.

**On Timer 1 ~ On Timer 7**

- **Setup**: Select Off, Once, Everyday, Mon~Fri, Mon~Sat, Sat~Sun or Manual.
  - If you select **Manual**, you can choose the days you want On Timer to turn on your product.
  - The check mark indicates days you've selected.
- **Time**: Set the hour and minute. Use the number buttons or the up and down arrow keys to enter numbers. Use the left and right arrow buttons to change entry fields.
- **Volume**: Set the desired volume level. Use the left and right arrow buttons to change the volume level.
- **Source**: Select the input source of your choice.
- **Contents** (when the **Source** is set to **Internal/USB**): From the USB device or internal memory device, select a folder containing content you want to play when the product turns on. Content can include music, photo or video files.
  - This function is available only when a USB device is connected.
  - If there is no music file on the USB device or you don't select a folder containing a music file, the Timer function does not operate correctly.
  - If there is only one photo file in the USB, the **Slide Show** will not play.
  - If a folder name is too long, the folder cannot be selected.
  - Each USB you use is assigned its own folder. When using more than one of the same type of USB, make sure the folders assigned to each USB have different names.
  - We recommend that you use a USB memory stick and a multi card reader when using On Timer.
  - The **On Timer** function may not work with USB devices with a built-in battery, MP3 players, or PMPs made by some manufacturers because the product can take too long to recognize these devices.
Off Timer

Set the off timer (Off Timer) by making a selection from one of the seven options. (Off Timer 1 ~ Off Timer 7)

- **Setup**: Select Off, Once, Everyday, Mon~Fri, Mon~Sat, Sat~Sun or Manual.
  - If you select Manual, you can choose the days you want Off Timer to turn off your product.
  - The check mark indicates days you've selected.
- **Time**: Set the hour and minute. Use the number buttons or the up and down arrow keys to enter numbers. Use the left and right arrow buttons to change entry fields.

Holiday Management

Timer will be disabled during a period specified as a holiday.

- **Add Holiday**: Specify the period you want to add as a holiday.
  - Select the start and end dates of the holiday you want to add using the ▲/▼ buttons, and click the Save button.
  - The period will be added to the list of holidays.
  - **Start**: Set the start date of the holiday.
  - **End**: Set the end date of the holiday.
  - **Delete**: Delete selected items from the list of holidays.
  - **Edit**: Select a holiday item and then change the date.

- **Set Applied Timer**: Set the On Timer and Off Timer to not activate on public holidays.
  - Press □ to select the On Timer and Off Timer settings you do not want to activate.
  - The selected On Timer and Off Timer will not activate.
Ticker

HOME ➔ Ticker ➔ ENTER ➔

- The displayed image may differ depending on the model.

Input text while a video or image is displayed and display the text on the screen.

- Off / On
- Message: Enter a message to display on the screen.
- Time: Set the Start Time and End Time to display a Message.
- Font options: Specify the text font and colour for the message.
- Position: Select an orientation to display a Message.
- Scroll: Specify the scroll Direction and Speed for the message.
- Preview: Preview configured caption settings.

More settings

HOME ➔ More settings ➔ ENTER ➔

- The displayed image may differ depending on the model.
For details on how to use the **URL Launcher** feature, contact the dealer the product was purchased from.

To use the **URL Launcher** feature, set **Play via** to **URL Launcher** in **System**.
Screen Adjustment

Configure the Picture settings (Backlight, Colour Tone, etc.). The layout of the Picture menu options may vary depending on the product.

**Picture Mode**

MENU  →  Picture  →  Picture Mode  →  ENTER

Select a picture mode (Picture Mode) suitable for the environment where the product will be used.

- **Shops & Malls**
  Suitable for shopping malls.
  - Select either Videos/Images or Text depending on the picture mode.

- **Offices & Schools**
  Suitable for offices and schools.
  - Select either Videos/Images or Text depending on the picture mode.

- **Terminals & Stations**
  Suitable for bus terminals and train stations.
  - Select either Videos/Images or Text depending on the picture mode.

- **Video Wall**
  Suitable for environments where videowall display are used.
  - Select either Videos/Images or Text depending on the picture mode.

- **Calibration**
  In this mode, the brightness, colour, gamma and uniformity settings customized using the colour calibration programme Advanced Colour Management are applied.
  - To apply the Calibration mode properly, make sure you configure the picture quality settings, such as brightness, colour, gamma and uniformity, using the colour calibration programme Advanced Colour Management.
  - For more information on the Advanced Colour Management programme, contact the dealer you purchased the product from.

- The displayed image may differ depending on the model.
Your product has several options for adjusting picture quality.

<table>
<thead>
<tr>
<th>Picture Mode</th>
<th>Picture Mode settings</th>
<th>Adjustable options</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

- When you make changes to Backlight, Contrast, Brightness, Sharpness, Colour or Tint (G/R), the OSD will be adjusted accordingly.
- You can adjust and store settings for each external device you have connected to an input on the product.
- Lowering picture brightness reduces power consumption.

The displayed image may differ depending on the model.
Colour Temperature

Adjust the colour temperature (Red / Green / Blue). (Range: 2800K–16000K)

- This option is available when Colour Tone is set to Off.
- If Picture Mode is set to Calibration, Colour Temperature is disabled.

The displayed image may differ depending on the model.
White Balance

MENU → Picture → White Balance → ENTER

2 Point
Adjust the colour temperature for a more natural picture.
- **R-Offset / G-Offset / B-Offset**: Adjust each colour's (red, green, blue) darkness.
- **R-Gain / G-Gain / B-Gain**: Adjust each colour's (red, green, blue) brightness.
- **Reset**: Suitable for environments where videowall display are used.

10 Point
Controls the white balance in 10 point interval by adjusting the red, green, and blue brightness.
- **Off / On**
  - **Level**: Select interval to adjust.
  - **Red**: Adjust the red level.
  - **Green**: Adjust the green level.
  - **Blue**: Adjust the blue level.
- **Reset**: Suitable for environments where videowall display are used.
- Some external devices may not support this function.
- Enabled when Picture Mode is set to Offices & Schools (Videos/Images).
**Gamma**

Adjust the primary colour intensity.

- If **Picture Mode** is set to **Calibration**, **Gamma** is disabled.

---

**Calibrated value**

Select whether to apply the brightness, colour, gamma and uniformity settings customized using the colour calibration programme **Advanced Colour Management** to the Information and Advertisement modes.

- **Don't apply** / **Apply**
- For more information on the **Advanced Colour Management** programme, contact the dealer you purchased the product from.
- If **Picture Mode** is set to **Calibration**, **Calibrated value** is disabled.

### Picture Mode

**Picture Mode settings**

- Shops & Malls, Offices & Schools, Terminals & Stations, Video Wall

**Adjustable options**

- Videos/Images: Colour Tone / Digital Clean View / MPEG Noise Filter / HDMI Black Level / Film Mode / Dynamic Backlight
- Text: Colour Tone / HDMI Black Level / Dynamic Backlight
- Calibration: HDMI Black Level / Dynamic Backlight

---

- The displayed image may differ depending on the model.
Colour Tone

If the input source is PC, DVI or HDMI1, HDMI2 (PC connection), DisplayPort.

- Off / Cool / Standard / Warm

If the input source is AV, Component or HDMI1, HDMI2.

- Off / Cool / Standard / Warm1 / Warm2

— If Picture Mode is set to Calibration, Colour Tone is disabled.

— Settings can be adjusted and stored for each external device connected to an input on the product.

Digital Clean View

If the broadcast signal received by your product is weak, you can activate the Digital Clean View feature to reduce any static and ghosting that may appear on the screen.

- Off / Low / Medium / High / Auto

— Received signal intensity is the strongest when the bar is green.

— When the signal is weak, try all the options until the the product displays the best picture.

MPEG Noise Filter

Reduces MPEG noise to provide improved picture quality.

- Off / Low / Medium / High / Auto

HDMI Black Level

Selects the black level on the screen to adjust the screen depth.

- Low / Normal

— Available only in DisplayPort, HDMI1, HDMI2 and DVI mode (AV Timing : 480p, 576p, 720p, 1080i, 1080p).
### Film Mode
This mode is suitable to view movies.
Sets the product to automatically sense and process film signals from all sources and adjust the picture for optimum quality.
- **Off / Auto1 / Auto2**
  - Available in AV, Component (480i / 1080i).

### Auto Motion Plus
Removes blur and judder from scenes with larger amounts of rapid movement to provide a clearer picture.
The menu names may vary depending on the country.
- **Off** : Switches Auto Motion Plus off.
- **Clear** : Sets Auto Motion Plus to Clear (suitable for viewing moving images clearly) mode.
- **Standard** : Sets Auto Motion Plus to Standard mode.
- **Smooth** : Sets Auto Motion Plus to Smooth (suitable for viewing moving images naturally) mode.
- **Custom** : Use to reduce the afterimage and judder as much as you want.
  - **Blur Reduction** : Use to reduce the afterimage as much as you want.
    - This is only supported if the Auto Motion Plus is set to **Custom**.
  - **Judder Reduction** : Use to reduce the judder as much as you want.
    - This is only supported if the Auto Motion Plus is set to **Custom**.
  - **LED Clear Motion** : Make moving images look more clear.
    - This is only supported if the Auto Motion Plus is set to **Custom**.
  - **Reset** : Restore Auto Motion Plus settings to default values.
    - The colour on screen may vary with this option unintentionally.
    - Disabled when PIP is set to **On**.

---

This function may differ depending on the model.

### Dynamic Backlight
Automatically adjust the backlight to provide the best possible screen contrast under the current conditions.
- **Off / On**

---

The **Dynamic Backlight** is not available when the input source is set to PC, AV or Component while **Video Wall** is **On**.
choose size and aspect ratio picture displayed on screen.

**Picture Size**

Different screen adjustment options are displayed depending on the current input source.

- **16:9**: Sets the picture to 16:9 wide mode.
- **Zoom1**: Use for moderate magnification. Cuts off the top and sides.
- **Zoom2**: Use for a stronger magnification.
- **Smart View 1**: Reduces the 16:9 picture by 50%.
  - Smart View 1 is enabled only in HDMI1, HDMI2 mode.
- **Smart View 2**: Reduces the 16:9 picture by 25%.
  - Smart View 2 is enabled only in HDMI1, HDMI2 mode.
- **Wide Fit**: Enlarges the aspect ratio of the picture to fit the entire screen.
- **4:3**: Sets the picture to basic (4:3) mode.
  - Do not set your product to 4:3 format for a long time. The borders displayed on the left and right, or top and bottom of the screen may cause image retention (screen burn) which is not covered by the warranty.
- **Screen Fit**: Displays the full image without any cut-off when HDMI1, HDMI2 (720p / 1080i / 1080p) or Component (1080i / 1080p) signals are inputted.
- **Custom**: Changes the resolution to suit the user's preferences.
- **Original ratio**: If the input source is PC, DVI, HDMI1, HDMI2 (PC connection), DisplayPort, the video will display in the original aspect ratio.

* The displayed image may differ depending on the model.
### Position

<table>
<thead>
<tr>
<th>Picture Size</th>
<th>Custom</th>
</tr>
</thead>
<tbody>
<tr>
<td>Position</td>
<td></td>
</tr>
<tr>
<td>Resolution</td>
<td>Off</td>
</tr>
</tbody>
</table>

Adjusts the picture position. **Position** is only available if **Picture Size** is set to **Zoom1**, **Zoom2**, **Wide Fit**, **Screen Fit**, or **Custom**.

To use the **Position** function after selecting **Zoom1**, **Zoom2**, **Wide Fit**, **Screen Fit**, or **Custom**, follow these steps:

1. Press the ▼ button to select **Position**. Press the ▶ button.
2. Press the ▲ or ▼ button to move the picture up or down.
3. Press the ▶ button.

---

### Zoom/Position

<table>
<thead>
<tr>
<th>Picture Size</th>
<th>Custom</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zoom/Position</td>
<td></td>
</tr>
<tr>
<td>Resolution</td>
<td>Off</td>
</tr>
</tbody>
</table>

Adjusts the picture zoom and position. This option is available when the input source is set to **HDMI1**, **HDMI2** (1080i/1080p) or **AV**, **Component** (1080i/1080p). **Picture Size** must be set to **Custom** for the option to be available.

1. Press the ▼ button to select **Zoom/Position**. Press the ▶ button.
2. Select the **Zoom** or **Position**. Press the ▶ button.
3. Press the ▲/▼/◄/► button to move the picture.
4. Press the ▶ button.

---

If you want to reset the picture to its original position, select **Reset** in the **Zoom/Position** screen. The picture will be set to its default position.
Resolution

If the picture is not normal even when the resolution of the graphics card is one of the following, you can optimize the picture quality by selecting the same resolution for the product as the PC using this menu.

Available resolutions: Off / 1024x768 / 1280x768 / 1360x768 / 1366x768
Auto Adjustment

Adjust frequency values/positions and fine tune the settings automatically.

MENU → Picture → Auto Adjustment → ENTER

Available in PC mode only.
The displayed image may differ depending on the model.

PC Screen Adjustment

MENU → Picture → PC Screen Adjustment → ENTER

Available in PC mode only.
The displayed image may differ depending on the model.

- **Coarse / Fine**
  Removes or reduces picture noise.
  If the noise is not removed by Fine-tuning alone, use the Coarse function to adjust the frequency as best as possible (Coarse) and Fine-tune again. After the noise has been reduced, re-adjust the picture so that it is aligned with the centre of screen.

- **Position**
  To adjust the PC's screen position if it is not centred or does not fit the product screen.
  Press the ▲ or ▼ button to adjust the Vertical Position. Press the ◄ or ► button to adjust the Horizontal Position.

- **Image Reset**
  Resets the image to the default settings.
**Picture Off**

Selecting **Picture Off** switches off the screen. The volume is not disabled. To switch the screen on, press any button other than the volume button.

**Reset Picture**

Resets your current picture mode to its default settings.
**OnScreen Display**

**PIP**

MENU → OnScreen Display → PIP → ENTER

**OnScreen Display**

- **PIP**
- Display Orientation
- Screen Protection
- Message Display
- Menu Transparency
- Menu Language
- Reset OnScreen Display

**PIP Settings**

The picture from the external video source will be in the main screen and the picture from the product will be in the PIP sub-picture screen.

<table>
<thead>
<tr>
<th>Main picture</th>
<th>Sub picture</th>

- The displayed image may differ depending on the model.
- For PIP sound, refer to the Sound Select instructions.
- If you turn the product off while watching in the PIP mode, PIP mode will remain after power Off/On.
- You may notice that the picture in the PIP screen becomes slightly unnatural when you use the main screen to view a game or karaoke.
• **PIP (Off / On):** Activate or deactivate the PIP function.
• **Source:** You can select a source of the sub picture.
• **Size:** Select a size for the subpicture.
• **Position:** Select a position for the sub-picture. 
   - In double mode, you cannot select **Position**.
• **Sound Select (Main / Sub):** You can choose to listen to the sound from the **Main** picture or the **Sub** picture.

― The displayed image may differ depending on the model.
## Display Orientation

MENU ➔ OnScreen Display ➔ Display Orientation ➔ ENTER

- The displayed image may differ depending on the model.

<table>
<thead>
<tr>
<th>Display Orientation</th>
<th>Landscape</th>
</tr>
</thead>
</table>

- Onscreen Menu Orientation

Configure the menu screen.

- **Landscape**: Display the menu in landscape mode (default).
- **Portrait**: Display the menu in portrait mode on the right side of the product screen.

- Available only PC, DVI, AV, HDMI1, HDMI2, MagicInfo, DisplayPort mode.

- Source Content Orientation

Rotate the product screen orientation.

- **Landscape**: Display the screen in landscape mode (default).
- **Portrait**: Display the screen in portrait mode.

- Available only PC, DVI, AV, HDMI1, HDMI2 (when a PC is connected), DisplayPort mode.

- Not available when PIP is set to On.

- Aspect Ratio

Set the rotated screen to be either full screen or original.

- **Full Screen**: Display the rotated screen in full screen.
- **Original**: Display the rotated screen in the original aspect ratio.

- Available only when Source Content Orientation is set to Portrait.

- Available only PC, DVI, AV, HDMI1, HDMI2 (when a PC is connected), DisplayPort mode.
Screen Protection

Auto Protection Time

If the screen displays a still image for a certain period of time you define, the product activates the screen saver to prevent the formation of burnt in ghost images on the screen.

- Off / 2 hours / 4 hours / 8 hours / 10 hours

Screen Burn Protection

To reduce the possibility of screen burn, this unit is equipped with Screen Burn Protection screen burn prevention technology.

Screen Burn Protection moves the picture slightly on the screen.

The Screen Burn Protection Time setting allows you to programme the time between movements of the picture in minutes.

Pixel Shift

Minimize image retention by finely moving pixels horizontally or vertically.

- Pixel Shift (Off / On)
  - Horizontal, Vertical and Time are enabled only when Pixel Shift is set to On.
- Horizontal: Sets how many pixels the screen moves horizontally.
- Vertical: Sets how many pixels the screen moves vertically.
- Time: Set the time interval for performing the horizontal or vertical movement, respectively.

Available Pixel Shift Settings and Optimum Settings.

<table>
<thead>
<tr>
<th></th>
<th>Available Settings</th>
<th>Optimum Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Horizontal (pixels)</td>
<td>0 ~ 4</td>
<td>4</td>
</tr>
<tr>
<td>Vertical (pixels)</td>
<td>0 ~ 4</td>
<td>4</td>
</tr>
<tr>
<td>Time (minute)</td>
<td>1 min ~ 4 min</td>
<td>4 min</td>
</tr>
</tbody>
</table>

The Pixel Shift value may differ depending on the product size (inches) and mode.

Displaying a still image or a 4:3 output for an extended period of time may cause image retention. This is not a defect in the product.

If Picture Size is set to Screen Fit, Pixel Shift is disabled.
The displayed image may differ depending on the model.

Timer

You can set the timer for Screen Burn Protection.
The Screen Burn Protection feature stops automatically after a specified period of time.

Timer

Off

Repeat: Display the image retention-preventive pattern set in Mode at specified time intervals (Period).
Interval: Display the image retention-preventive pattern set in Mode for a specified period of time (from Start Time to End Time).

Mode, Period, Time, Start Time and End Time are enabled only when Timer is set to Repeat or Interval.

- Mode: Select a screen protective pattern to display.
  - Pixel: Pixels on the screen alternate black continuously.
  - Rolling bar: A vertical bar moves left to right.
  - Fading screen: The entire screen becomes brighter, then darker.

  The Rolling bar and Fading screen patterns appear only once regardless of the specified repeat period or time.

- Period: Specify the time interval to activate the Screen Burn Protection function.

  The option is enabled when Repeat is selected for Timer.

- Time: Specify the duration to keep the Screen Burn Protection function on.

  Enabled when Timer is set to Repeat and Mode is set to Pixel.

- Start Time: Set the start time to activate the screen protection function.

  The option is enabled when Interval is selected for Timer.

- End Time: Set the end time to deactivate the screen protection function.

  The option is enabled when Interval is selected for Timer.
Screen Burn Protection

- Pixel Shift
- Timer

Immediate display

- Off / On

MDC Message

- Off / On

Immediate display

Select the screen saver you want to display immediately.

- Off / Pixel / Rolling bar / Fading screen

Side Grey

When the screen is set to 4:3 aspect ratio, adjust the brightness of white margins on sides to protect the screen.

- Off / Light / Dark
Menu Transparency

Adjust transparency of menu box.

• High / Medium / Low

Menu Language

Set the menu language.

A change to the language setting will only be applied to the onscreen menu display. It will not be applied to other functions on your PC.
Reset OnScreen Display

This option returns the current settings under OnScreen Display to the default factory settings.

MENU → OnScreen Display → Reset OnScreen Display → ENTER

- The displayed image may differ depending on the model.
Sound Adjustment

Configure the sound settings for the product.

Sound Mode

MENU → Sound → Sound Mode → ENTER

You can select a sound mode to suit your personal preferences.
- **Standard**: Selects the normal sound mode.
- **Music**: Emphasizes music over voices.
- **Movie**: Provides the best sound for movies.
- **Clear Voice**: Emphasizes voices over other sounds.
- **Amplify**: Increase the intensity of high-frequency sound to allow a better listening experience for the hearing impaired.

If **Speaker Settings** is set to **External**, **Sound Mode** is disabled.

- The displayed image may differ depending on the model.
- Applicable to the OM**D-W model only.
Sound Effect

Configure your preferred sound effect for output sound.

- If Speaker Settings is set to External Sound Effect is disabled.
- Available only when Sound Mode is set to Standard.

Virtual Surround

This function provides a virtual 5.1 channel surround sound experience through a pair of speakers using HRTF (Head Related Transfer Function) technology.

- Off / On

Dialog Clarity

This function allows you to increase the intensity of a voice over background music or sound effects so that dialog can be heard more clearly.

- Off / On

Equaliser

Use Equaliser to customize sound setting for each speaker.

- Balance L/R: Adjusts the balance between the right and left speaker.
- 100Hz / 300Hz / 1kHz / 3kHz / 10kHz (Bandwidth Adjustment): Adjusts the level of specific bandwidth frequencies.
- Reset: Resets the equalizer to its default settings.
**HDMI Sound**

MENU ➞ Sound ➞ HDMI Sound ➞ ENTER

Select whether to hear from AV(HDMI) or PC(DVI).

- AV(HDMI) / PC(DVI)

---

The displayed image may differ depending on the model.

---

**Sound on Video Call**

MENU ➞ Sound ➞ Sound on Video Call ➞ ENTER

Select sound output to listen to during a video call.

- Current Source / Video Call

---

The displayed image may differ depending on the model.

---

Applicable to the OM**D-W model only.
Speaker Settings

MENU → Sound → Speaker Settings → ENTER

Sound Output

- Internal (Applicable to the OM**D-W model only) / External / Receiver

- If there is no video signal, both the product’s speakers and the external speakers will be mute.

Sound Output

- Sound Output
  - Internal (Applicable to the OM**D-W model only) / External / Receiver

- If there is no video signal, both the product’s speakers and the external speakers will be mute.

Auto Volume

MENU → Sound → Auto Volume → ENTER

Auto Volume

- Auto Volume Off

- The displayed image may differ depending on the model.

- Applicable to the OM**D-W model only.

- If there is no video signal, both the product’s speakers and the external speakers will be mute.

Auto Volume

- Auto Volume Off

- The displayed image may differ depending on the model.

- Applicable to the OM**D-W model only.

- To use the volume control of a connected source device, set Auto Volume to Off. A change to the volume control of the connected source device may not be applied if Auto Volume is set to Normal or Night.

Normal equalizes the volume level on each channel, so that when you change channels, the volume level is the same.

Night equalizes and decreases the volume level on each channel, so each channel is quieter. Night is useful at night, when you may want to keep the volume low.

- To use the volume control of a connected source device, set Auto Volume to Off. A change to the volume control of the connected source device may not be applied if Auto Volume is set to Normal or Night.

Night equalizes and decreases the volume level on each channel, so each channel is quieter. Night is useful at night, when you may want to keep the volume low.

- To use the volume control of a connected source device, set Auto Volume to Off. A change to the volume control of the connected source device may not be applied if Auto Volume is set to Normal or Night.
Reset Sound

The displayed image may differ depending on the model. Reset all sound settings to the factory defaults.
Network

Network Status

MENU → Network → Network Status → ENTER

You can check the current network and Internet status.

You are connected to the Internet. If you have any problems using online services, please contact your Internet service provider.

Network Settings

MENU → Network → Network Settings → ENTER

Configure network settings to use various smart hub features such as Internet search, content sharing through a home network and feature updates.

Network Type

- Wireless / Wired

- The displayed image may differ depending on the model.
Network Settings (Wired)

Connecting to a Wired Network

There are three ways to attach your product to your LAN using cable.

- You can attach your product to your LAN by connecting the LAN port on the back of your product to an external modem using a LAN cable. See the diagram below.

![Diagram showing connection to an external modem](image1)

- You can attach your product to your LAN by connecting the LAN port on the back of your product to an IP Sharer which is connected to an external modem. Use LAN cable for the connection. See the diagram below.

![Diagram showing connection to an IP Sharer](image2)

- Depending on how your network is configured, you may be able to attach your product to your LAN by connecting the LAN port on the back of your product directly to a network wall outlet using a LAN cable. See the diagram below. Note that the wall outlet is attached to a modem or router elsewhere in your house.

![Diagram showing connection to a network wall outlet](image3)

If you have a Dynamic Network, you should use an ADSL modem or router that supports the Dynamic Host Configuration Protocol (DHCP). Modems and routers that support DHCP automatically provide the IP address, subnet mask, gateway, and DNS values your product needs to access the Internet so you do not have to enter them manually. Most home networks are Dynamic Networks.

Some networks require a Static IP address. If your network requires a Static IP address, you must enter the IP address, subnet mask, gateway, and DNS values manually on your product Cable Setup Screen when you set up the network connection. To get the IP address, subnet mask, gateway, and DNS values, contact your Internet Service Provider (ISP).

If you have a Windows computer, you can also get these values through your computer.

- You can use ADSL modems that support DHCP if your network requires a Static IP address.
- ADSL modems that support DHCP also let you use Static IP addresses.
Set the network connection to use Internet services such as perform software upgrades.

**Automatic Network Settings (Wired)**

Connect to the network using a LAN cable. Make sure a LAN cable is connected first.

**How to set up automatically**

1. Set **Network Type** to **Wired** from the **Network Settings** page.
2. Press the **Connect** button to start **Network Settings**.
   - The **Connect** button is only enabled when the LAN cable is properly connected.
3. The network test screen appears and verifies the network connection.
   - When the connection has been verified, the "**Wired network and Internet connection completed.**" message appears.
   - If the connection process fails, check the LAN port connection.
   - If the automatic process cannot find the network connection values or if you want to set the connection manually, go to the next section, **network setup**.

**Manual Network Settings (Wired)**

Offices may use static IP addresses. If this is the case, ask the network administrator for the IP address, subnet mask, gateway and DNS server address. Enter these values manually.

**Getting the Network Connection Values**

To view the Network connection values on most Windows computers, follow these steps.

1. Right click the Network icon on the bottom right of the screen.
2. In the pop-up menu that appears, click **Status**.
3. On the dialog that appears, click the **Support** tab.
4. On the **Support** Tab, click the **Details** button. The Network connection values are displayed.

**How to set up manually**

1. Set **Network Type** to **Wired** from the **Network Settings** page.
2. Press the **Connect** button to start **Network Settings**.
   - The **Connect** button is only enabled when the LAN cable is properly connected.
3. The network test screen appears and the verification process starts. Press **Stop**. The verification process stops.
4. Select **IP Settings** on network connection screen. The **IP Settings** screen appears.
5. Select the field at the top, press ⏎, and then set **IP Settings** to **Enter manually**. Repeat the entry process for each field in the **IP Address**.
   - Setting **IP Settings** to **Enter manually** automatically changes **DNS Setting** to **Enter manually**.
6. When done, select **OK** at the bottom of the page, and then press ⏎. The network test screen appears and the verification process starts.
7. When the connection has been verified, the "**Wired network and Internet connection completed.**" message appears.
Network Setting (Wireless)

Connecting to a Wireless Network

Samsung recommends using IEEE 802.11n. When you play video over a network connection, the video may not play smoothly.

- Select a channel for the wireless IP sharer that is not currently being used. If the channel set for the wireless IP sharer is currently being used by another device nearby, this will result in interference and communication failure.
- Your product supports only the following wireless network security protocols.
  - If you select the Pure High-throughput (Greenfield) 802.11n mode and the Encryption type is set to WEP, TKIP or TKIP AES (WPS2Mixed) on your AP or wireless router, Samsung products will not support a connection in compliance with new Wi-Fi certification specifications.
- If your wireless router supports WPS (Wi-Fi Protected Setup), you can connect to the network via PBC (Push Button Configuration) or PIN (Personal Identification Number). WPS will automatically configure the SSID and WPA key in either mode.
- Connection Methods: You can setup the wireless network connection in three ways.
  - Auto Setup (Using the Auto Network Search function), Manual Setup, WPS(PBC)

Automatic Network Setup (Wireless)

Most wireless networks have an optional security system that requires devices that access the network to transmit an encrypted security code called an Access or Security Key. The Security Key is based on a Pass Phrase, typically a word or a series of letters and numbers of a specified length you were asked to enter when you set up security for your wireless network. If you use this method of setting up the network connection, and have a Security Key for your wireless network, you will have to enter the Pass Phrase during the automatic or manual setup process.

How to set up automatically

1. Set Network Type to Wireless from the Network Settings page.
2. The Network function searches for available wireless networks. When done, it displays a list of the available networks.
3. In the list of networks, press the ▲ or ▼ button to select a network, and then press the ▶ button twice.
   - If the desired wireless router does not appear, select Refresh to search again.
   - If the router cannot be found after retrying, select the Stop button. The Add Network button appears. Select Add Network to add a wireless router to connect to.
4. If the Enter password screen appears, go to step 5. If you select a wireless router that does not have security, go to step 7.
5. If the router has security, enter the Enter password. (Security key or PIN).
When done, use the right arrow button to move the cursor to Done, and then press . The network connection screen appears and the verification process starts.

When the connection has been verified, the "Your wireless network and Internet connection are setup and ready to use." message appears.

**Manual Network Setup (Wireless)**

Offices may use static IP addresses.

If this is the case, ask the network administrator for the IP address, subnet mask, gateway and DNS server address. Enter these values manually.

**Getting the Network Connection Values**

To view the Network connection values on most Windows computers, follow these steps.

1. Right click the Network icon on the bottom right of the screen.
2. In the pop-up menu that appears, click Status.
3. On the dialog that appears, click the Support tab.
4. On the Support Tab, click the Details button. The Network connection values are displayed.

**How to set up manually**

1. Set Network Type to Wireless from the Network Settings page.
2. The Network function searches for available wireless networks. When done, it displays a list of the available networks.
3. In the list of networks, press the ▲ or ▼ button to select a network, and then press the ▶ button twice.

   If the desired wireless router does not appear, select Refresh to search again.

   If the router cannot be found after retrying, select the Stop button.

4. Select Add Network to add a wireless router to connect to.
5. If the Enter password. screen appears, go to step 5. If you select a wireless router that does not have security, go to step 7.
6. When done, use the right arrow button to move the cursor to Done, and then press . The network connection screen appears and the verification process starts.
7. Select Stop while network connections are being attempted. This will stop the connection.
8. Select IP Settings on network connection screen. The IP Settings screen appears.
9. Select the field at the top, press , and then set IP Settings to Enter manually. Repeat the entry process for each field in the IP Address.

   Setting IP Settings to Enter manually automatically changes DNS Setting to Enter manually.
10 When done, select **OK** at the bottom of the page, and then press ✅. The network test screen appears and the verification process starts.

11 When the connection has been verified, the “**Your wireless network and Internet connection are setup and ready to use.**" message appears.

**WPS(PBC)**

**How to set up using WPS(PBC)**

If your router has a **WPS(PBC)** button, follow these steps.

1. Set **Network Type** to **Wireless** from the **Network Settings** page.

2. Select **WPS(PBC)**, press ✅, and then press ✅ again.

3. Press the **WPS(PBC)** button on your router within 2 minutes. Your product automatically acquires all the network setting values it needs and connects to your network.

4. The network connection screen appears, and network setup is done.
To use this function, your mobile device should be supported by the Wi-Fi Direct.

Wi-Fi Direct

MENU → Network → Wi-Fi Direct → ENTER

Set to connect the product to wireless mobile devices. Using this function, you can connect wireless mobile devices with your product directly without a router.

To connect your mobile device with your product using Wi-Fi Direct, follow these steps:

1. Go to Wi-Fi Direct screen. The product starts to search devices.

2. Turn on the Wi-Fi Direct function on your device. Select the desired Wi-Fi device.
   - PBC (Push Button Configuration): Press the WPS(PBC) button on your Wi-Fi device within 2 minutes. Your product automatically acquires all the network setting values it needs and connects to your network.
   - PIN: Input the displayed PIN on your device.

   If you want to disconnect the device, select the connected Wi-Fi device, and then select Disconnected.

Multimedia Device Settings

MENU → Network → Multimedia Device Settings → ENTER

Allow other devices such as smart phones and tablets on your network, to share content with your product.
Screen Mirroring

Connect a mobile device that supports the mirroring function to the product. This allows the screen and sound from the mobile device to be outputted on the product. Mirroring refers to outputting the screen and sound from a mobile device on a display device.

- To use Screen Mirroring, make sure the mobile device supports the mirroring function such as AllShare Cast, WiDi (version 3.5 or higher) and Miracast. To check if the mirroring function is available, visit the mobile device manufacturer website.
- Screen or sound output may be choppy if there is network congestion.

Screen Mirroring

Run the mirroring function from the mobile device. The mobile device automatically searches and displays the product in a list.
- If the mobile device cannot connect to the product, turn them off and then on again, and try again.

Server Network Settings

Connect to server

To run Player connect to a network.
- If the SSL option is enabled, the server is configured to use https and data transfer is encrypted.
- Enter the server IP address and port number. Use 7001 as the port number. (If unable to connect to the server using port number 7001, check with your server administrator to find the correct port number and then change the port number.)

MagicInfo Mode

Select the appropriate MagicInfo Mode depending on the environment where you are using the product.
- Lite / Premium

Server Access

Select a method to connect the server network.
- Allow / Deny

FTP Mode

Specify the FTP operating mode.
- Active / Passive
Device Name

MENU → Network → Device Name → ENTER

Select or enter a device name.

This name can be shown on network remote controls over the network.
Initial settings (System)

After powering on the product for the first time, configure basic settings such as the language, channel and time.

Press the \( \text{button} \).

- Enter your 4 digit PIN number. The default PIN number is "0-0-0-0".
- If you want to change the PIN number, use the Change PIN function.

1. Selecting a language
   - Press the \( \text{ or } \text{ button, and then press the button. Specify the OSD menu language.} \n
2. Display Orientation
   - Configure the menu page orientation.
     - Landscape / Portrait

3. Auto Power Off
   - Set the time to automatically turn off the product when it is left idle for an extended period of time.
     - Off (Recommended) / 4 hours / 6 hours / 8 hours

4. Network Settings
   - Set up your network connection. Press the \( \text{ button to start. If you do not know your network set up information or want to set it later, select Skip. You can set up the network connection later using the Network menu.} \n
5. Clock Set
   - Set the current date and time, and then select Next.
6 Play via

Select the appropriate player mode depending on the environment where you are using the product.

The Play via setting step only appears when connected to the network.

7 Setup Complete

Congratulations! Setup is complete and you’re ready to get started.
Time

You can configure Clock Set or Sleep Timer. You can also set the product to automatically turn on or off at a specified time using the Timer function.

Press the INFO button if you want to view the current time.

Clock Set
Select Clock Set. Select Date or Time, and then press ENTER.
Use the number buttons to enter numbers or press the up and down arrow buttons. Use the left and right arrow buttons to move from one entry field to the next. Press ENTER when done.

You can set the Date and Time directly by pressing the number buttons on the remote control.

DST
Switches the DST (Daylight Saving Time) function on or off.

Off / On
• Start Date: Set the start date of Daylight Saving Time.
• End Date: Set the end date of Daylight Saving Time.
• Time Offset: Select the correct time offset your timezone.

Sleep Timer
Automatically shuts off the product after a preset period of time.
(Off / 30 min / 60 min / 90 min / 120 min / 150 min / 180 min)

Use the up and down arrows to select a period of time, and then press ENTER. To cancel Sleep Timer, select Off.

Power On Delay
When connecting multiple products, adjust the power-on time for each product to prevent power overload (within the range 0–50 seconds).

The displayed image may differ depending on the model.
Auto Source Switching

Turning on the display with Auto Source Switching On, and the previous video source selection is not active, the display will automatically search the different video input sources for active video.

Auto Source Switching

When the Auto Source Switching is On, the display video source will automatically be searched for active video. The Primary Source selection will be activated, if the current video source is not recognized. Secondary Source selection will become active, if no primary video source is available.

If both the primary and secondary input sources are not recognized, the display will perform two searches for an active source, each search checking the primary and then secondary source. If both searches fail, the display will return to the first video source and display a message indicating that there is no signal.

When the Primary Source selection is set to All, the display will search all the video source inputs twice in sequence looking for an active video source, returning back to the first video source in the sequence if no video is found.

Primary Source Recovery

Select whether to restore the selected primary input source when a primary input source is connected.

The Primary Source Recovery function is disabled if Primary Source is set to All.

Primary Source

Specify Primary Source for the automatic input source.

Secondary Source

Specify Secondary Source for the automatic input source.
Auto Power On
This feature automatically turns on the product as soon as it is plugged in. Pressing the power button is not needed.

- Off / On

PC module power
The PC module can be turned on/off separately from the LFD.

**Synced power-on**
To turn on the PC module without turning on the LFD, select Off.
- Off / On

**Synced power-off**
To turn off the LFD without turning off the PC module, select Off.
- Off / On

Max. Power Saving
Turns off the product to reduce power consumption after the PC has been left idle for a specified period of time.

- Off / On

---
Available only **PC, DVI, HDMI1, HDMI2, DisplayPort** mode.
Standby Control

You can set the screen standby mode to be applied when an input signal is received.

- **Auto**
  
  Power-saving mode will activate if no input signals are detected even though a source device is connected to the display. The message *No Signal* will appear if no source device is connected.

- **Off**
  
  The message *No Signal* will appear if no input signals are detected.

- The Standby Control option is only enabled when Source is set to PC, DVI, HDMI1, HDMI2 or DisplayPort.

- If *No Signal* is displayed although a source device is connected, check the cable connection.

- If No Signal Message is set to Off, the No Signal message does not appear.

  If this is the case, set No Signal Message to On.

- **On**

  Power-saving mode will activate if no input signals are detected.

Power Button

The power button can be set to either turn on the power or turn on/off the power.

- **Power on only**: Set the power button to turn on the power.

- **Power on and off**: Set the power button to turn on/off the power.

Network Standby

This feature keeps the network power on when the product turns off.

- **Off / On**
Eco Solution

MENU → System → Eco Solution → ENTER

Brightness Limit
Limit the screen's maximum backlight level.
- Off: Off allows you to use the maximum brightness available.
- On: On prevents the use of maximum brightness and saves energy.

Energy Saving
Reduce the power consumption by adjusting the screen brightness.
- Off / Low / Medium / High

Eco Sensor
To enhance your power savings, the picture settings will automatically adapt to the light in the room.
- Off / On
  - Adjusting the High setting under Picture while Eco Sensor is on will disable the Off.

Min. Backlight
When Eco Sensor is On, you can manually adjust the minimum screen brightness. Min. Backlight is the darkest backlight mode. Make sure the Min. Backlight setting is lower than the Backlight setting.
  - If Eco Sensor is On, the display brightness may change (become slightly darker or brighter) depending on the surrounding light intensity.

The displayed image may differ depending on the model.
**Eco Solution**

- **Brightness Limit**: On

- **Auto Power Off**: Off

---

**Screen Lamp Schedule**

Enable or disable the lamp schedule.

- **Off / On**

**Schedule 1, Schedule 2**

**Time**

The panel brightness will change to the brightness set in *Time* at a specified time.

**Lamp**

Adjust the panel brightness. A value closer to 100 makes the panel brighter.

- **0 ~ 100**

**No Signal Power Off**

Save power by turning the device off when no signal is received from any source.

- **Off / 15 min / 30 min / 60 min**
  - Disabled when an attached PC is in power saving mode.
  - The product will automatically power off at a specified time. The time can be changed as required.

**Auto Power Off**

The product will automatically turn off if you don't press a button on the remote or touch a button on product front panel within select hours to prevent overheating.

- **Off / 4 hours / 6 hours / 8 hours**
Fan and Temperature

Protects the product by detecting the fan speed and internal temperature.

Fan Control
Selects auto or manual for the fan speed settings.
- Auto / Manual

Fan Speed Setting
Sets the fan speed within a range of 0 and 100.
- Enabled when Fan Control is set to Manual.

Temperature Control
This function detects the internal temperature of the product. You can specify the temperature range that is acceptable. The default temperature is set to 77°C.
The recommended operating temperature for this product is 75 to 80°C (based on an ambient temperature of 40°C).
- The screen will become darker if the current temperature exceeds the specified temperature limit. If the temperature continues to rise, the product will power off to prevent overheating.

Change PIN

MENU → System → Change PIN → ENTER

System

- Change PIN

The Change PIN screen will appear. Choose any 4 digits for your PIN and enter it in Enter New PIN. Reenter the same 4 digits in Confirm New PIN. When the Confirm screen disappears, press the Close button. The product has memorised your new PIN.

- Default password: 0 - 0 - 0 - 0

---

* The displayed image may differ depending on the model.
General

MENU → System → General → ENTER

- The displayed image may differ depending on the model.

**General**

- **BD Wise**: On
- **Anynet+ (HDMI-CEC)**: On
- **HDMI Hot Plug**: On
- **DivX® Video On Demand**: Off
- **Game Mode**: Off

**Security**

**Safety Lock**

It sets safe lock function.

- **Off / On**

All the menus and buttons of the product and remote control, except for the LOCK button on the remote control, will be locked by the **Safety Lock** function.

To unlock the menus and buttons, press the **LOCK** button and then enter the password (default password: 0 - 0 - 0 - 0).

**Button Lock**

This menu can be used to lock the buttons on the product.

Only the remote control can control the product if **Button Lock** is set to **On**.

- **Off / On**

**USB Auto Play Lock**

Select whether to automatically play **MagicInfo** content saved on a connected USB device.

- **On**
  - Do not play **MagicInfo** content saved on the USB device automatically.
  - Connecting a USB device containing **MagicInfo** content displays “USB Auto Play Lock : On” for five seconds.
- **Off**
  - Play **MagicInfo** content saved on the USB device automatically.

**BD Wise**

Provides the optimal picture quality for Samsung DVD, Blu-ray and Home Theatre products which support **BD Wise**. When **BD Wise** is turned **On**, the picture mode is automatically changed to the optimal resolution.

- **Off / On**

- Available when you connect Samsung products that support **BD Wise** through an HDMI cable to the product.

- The **BD Wise** function is enabled only when a source device with the **BD Wise** function is connected.
Anynet+ (HDMI-CEC)

Anynet+ is a function that enables you to control all connected Samsung devices that support Anynet+ with your Samsung product remote. The Anynet+ system can be used only with Samsung devices that have the Anynet+ feature. To be sure your Samsung device has this feature, check if there is an Anynet+ logo on it.

- You can only control Anynet+ devices using the product remote control, not the buttons on the product.
- The product remote control may not work under certain conditions. If this occurs, reselect the Anynet+ device.
- Anynet+ works when the AV device supporting Anynet+ is in the standby or on status.
- While in PIP mode, Anynet+ functions only when an AV device is connected as the primary display. It does not work if the AV device is connected as a secondary display.
- Anynet+ supports up to 12 AV devices in total. Note that you can connect up to 3 devices of the same type.

Anynet+ Menu

The Anynet+ menu changes depending on the type and status of the Anynet+ devices connected to the product.

### Anynet+ Menu

<table>
<thead>
<tr>
<th>Anynet+ Menu</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>View PC</td>
<td>Changes Anynet+ mode to PC mode.</td>
</tr>
<tr>
<td>Device List</td>
<td>Shows the Anynet+ device list.</td>
</tr>
<tr>
<td>(device_name) Menu</td>
<td>Shows the menu of the connected device menus. E.g. if a DVD player is connected, the disc menu of the DVD player will appear.</td>
</tr>
<tr>
<td>(device_name) Tools</td>
<td>Shows the tools menu of the connected device. E.g. if a DVD player is connected, the tools menu of the DVD player will appear. Depending on the device, this menu may not be available.</td>
</tr>
<tr>
<td>(device_name) Title Menu</td>
<td>Shows the title menu of the disc in the connected device. E.g. if a DVD player is connected, the title menu of the movie in the DVD player will appear. Depending on the device, this menu may not be available.</td>
</tr>
</tbody>
</table>
Auto Turn Off
Setting an Anynet+ Device to turn Off automatically when the product is turned off.

- No / Yes
- If Auto Turn Off is set to Yes, running external devices will turn off at the same time as the product powers off.
- May not be enabled depending on the device.

Search for Devices

Switching between Anynet+ Devices

1. Press the TOOLS button, select Anynet+ (HDMI-CEC), and then press  
2. Select Device List, and then press the  button.
   If you cannot find a device you want, select Refresh to refresh the list.
3. Select a device, and then press the  button. You can switch to the selected device.

- The Device List menu appears only when you set Anynet+ (HDMI-CEC) to On in the System menu.
- Switching to the selected device may take up to 2 minutes. You cannot cancel the switching operation while switching is in progress.
- If you have selected an Anynet+ device by pressing the SOURCE button and then selecting its input source, you cannot use the Anynet+ function.
- Make sure to switch to an Anynet+ device by using the Device List.
# Troubleshooting for Anynet+

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solution</th>
</tr>
</thead>
</table>
| Anynet+ does not work. | • Check if the device is an Anynet+ device. The Anynet+ system supports Anynet+ devices only.  
• Check if the Anynet+ device power cord is properly connected.  
• Check the Anynet+ device's Video/Audio/HDMI cable connections.  
• Check whether Anynet+ (HDMI-CEC) is set to On in the System menu.  
• Check whether the remote control is Anynet+ compatible.  
• Anynet+ doesn't work in certain situations. (initial setup)  
• If you have removed and then reconnected the HDMI cable, please make sure to search devices again or turn your product off and on again.  
• Check if the Anynet+ function of the Anynet device is set on. |
| I want to start Anynet+. | • Check if the Anynet+ device is properly connected to the product and check if the Anynet+ (HDMI-CEC) is set to On in the System menu.  
• Press the TOOLS button to display the Anynet+ menu and select a menu you want. |
| I want to exit Anynet+. | • Select View PC in the Anynet+ menu.  
• Press the SOURCE button on the product remote control and select a non- Anynet+ device. |
| The message "Disconnecting Anynet+ device ..." appears on the screen. | • You cannot use the remote control when you are configuring Anynet+ or switching to a view mode.  
• Use the remote control after the product has completed Anynet+ configuration or has finished switching to Anynet+. |
<p>| The Anynet+ device does not play. | • You cannot use the play function when initial setup is in progress. |</p>
<table>

HDMI Hot Plug
This feature is used to activate the time delay to turn on a DVI/HDMI source device.
- Off / On

DivX® Video On Demand
Shows the registration code authorized for the product.
If you connect to the DivX® web site and register using that code, you can download the VOD registration file.
For more information about DivX® VOD, visit “http://vod.divx.com”.

Game Mode
When connecting to a game console such as PlayStation™ or Xbox™, you can enjoy a more realistic gaming experience by selecting game mode.
- Off / On

- Precautions and limitations for Game Mode
  To disconnect the game console and connect another external device, set Game Mode to Off in the setup menu.

- Game Mode is not available when the input source is set to DVI or DisplayPort.
Reset System

This option returns the current settings under system to the default factory settings.

MENU → System → Reset System → ENTER

- The displayed image may differ depending on the model.
Software Update

MENU → Support → Software Update → ENTER

The Software Update menu lets you upgrade your product software to the latest version.

- Be careful not to turn off the power until the upgrade is complete. The product will turn off and on automatically after completing the software upgrade.
- When you upgrade software, all video and audio settings you have made will return to their default settings. We advise you to write down your settings so that you can easily reset them after the upgrade.

Update now

Update the software to the latest version.

Auto update

This feature automatically updates the product when not in use.

- Off / On

Contact Samsung

MENU → Support → Contact Samsung → ENTER

View this information when your product does not work properly or when you want to upgrade the software.

You can find information regarding our call centres and how to download products and software.

- Contact Samsung and find the product Model Code and Software Version.
Go to Home

Accessible using the HOME button on the remote control.

MENU → Support → Go to Home → ENTER

Go to Home to play a variety of content from a memory device or a connected network.

Player

Search or play channels or content saved on devices.

Schedule

Create content schedules in local channels or edit saved channels.

Template

To create content, select a template.

Clone Product

Export the product settings to a USB device or load the settings via a USB device.
This option is useful when assigning the same settings to several products.

ID Settings

Assign an ID to a set.
Press ▲/▼ to select a number, and press □.
Video Wall
Customize the layout of multiple displays that are connected to form a video wall.
In addition, display part of a whole picture or repeat the same picture on each of the connected multiple displays.
To display multiple images, refer to MDC Help or the MagicInfo user guide. Some models may not support the MagicInfo function.

Network Status
Check the current network and Internet connection.

Picture Mode
Select a picture mode (Picture Mode) suitable for the environment where the product will be used.

On/Off Timer
You must set the clock before you can use On/Off Timer.
Set On Timer so that your product turns on automatically at a time and on a day of your choosing.
The power is turned on with the specified volume or input source.

Ticker
Input text while a video or image is displayed and display the text on the screen.

More settings
The picture settings menu appears.
Reset All

This option returns all the current settings for a display to the default factory settings.

MENU → Support → Reset All → ENTER

- The displayed image may differ depending on the model.
Playing photos, videos and music (Media Play)

Enjoy videos, photos, music files saved on a USB Mass Storage Class (MSC) device.

Play photos, videos or music saved on a storage device.
Play a variety of content using the following methods.

- Using a USB device: Play media content such as videos, photos and music from a USB device.
- Connecting a storage device: Play media content saved on a storage device such as a smartphone, camera, PC or cloud service.

Read the following before using media play with a USB device

**Caution**

- Before connecting a USB device to the product, back up files to ensure your data is not damaged or lost. Samsung Electronics is not liable for any damage or loss of data.
- Do not remove a USB device while it is loading.
- If a USB device is connected using a USB extension cable, the USB device may not be recognized or files saved on the device may not be able to be read.
- If the product does not recognize a connected USB device, the files on the USB device may be corrupted or may not be able to be played. If this occurs, connect the USB device to the PC to format the device, then make sure the device is connected properly.
- USB HDD greater than 2TB is not supported.
Compatible devices with media play

- Some USB digital cameras, smartphones and audio devices may not be compatible with the product.
- Media play is only compatible with USB MSC devices.
- MSC device refers to a Mass Storage Class Bulk-Only Transport device.
  Examples of MSC devices include Thumb drives, Flash card readers and USB HDDs. (USB hubs are not supported.)
  These MSC devices must be connected directly to a USB port on the product.
- If more than one Picture Transfer Protocol (PTP) device is connected, only one will work at a time.
- If multiple MSC devices are connected, some devices may not be recognized. USB devices that require high power (higher than 500mA or 5V) may not be supported.
- If an overheating warning message appears when a USB device is connected or used, the USB device may not be recognized or function properly.
- The screensaver activates if the product is left idle for a period of time specified in Auto Protection Time.
- Power-saving mode on some external hard disk drives may automatically deactivate after connecting to the product.

File system and formats

- Media play may not function properly with unlicenced multimedia files.
- Media Transfer Protocol (MTP) is not supported.
- Supported file systems include FAT16, FAT32 and NTFS (read only).
- Media play supports the sequential JPEG format.
  It does not support the progressive JPEG format.
- Images with a higher resolution take longer to be displayed on the screen.
- The maximum JPEG resolution supported is 15360x8640 pixels.
- If a file is incompatible or corrupted, a message Not Supported File Format appears.
- When sorting files in folder view mode, a maximum of 1000 files can be displayed in each folder.
- If a USB device contains 8000 files and folders or more, some files and folders may not open.
- DRM MP3 files downloaded from websites that charge a fee cannot be played.

Digital Rights Management (DRM) refers to a system for protecting the copyrights of data circulated via the Internet or other digital media by enabling secure distribution and/or disabling illegal distribution of the data.
Using a USB device

Connecting a USB device

1. Turn on your product.
2. Connect a USB device containing photo, music and/or movie files to the USB port on the back or side panel of the product.
3. The Player page automatically appears as soon as a USB device connects to the product.

   - If only one USB device is connected, files saved on the USB device are displayed automatically.
   - To view content saved on a USB device, connect the USB device to a USB port on the product.

Removing a USB device

Removing a USB device from Source

1. Press SOURCE on the remote control. Alternatively, go to Source using the OSD menu.
2. Select USB from Source, and then press the TOOLS button on the remote control. The Options menu is displayed.
3. Select Disconnect USB Device and wait until the USB device is disconnected. The USB device is disconnected.
Playing media content from a PC/mobile device

Approving a PC/mobile device connection

Play photos, videos or music saved on a PC or mobile device.

To play media content from a PC or mobile device on the product, the connection with the PC or mobile device must be approved.

The media playback feature is available on any devices that support DLNA DMC. The DLNA DMC feature allows you to search media content and control content playback from a product after connecting a PC or mobile device to the product.

1  Press SOURCE on the remote control. Alternatively, go to Source using the OSD menu.

2  Select Network from Source. The Network Device menu appears.

3  Select Options from the screen, and then select Multimedia Device Settings. A list of devices connected to the product will appear.

4  Select a device and approve the device connection. Playback is only available on devices that are permitted to connect.

Sending a media content playback request from a PC or mobile device displays a prompt asking if connection with the product is permitted. Conveniently connect the devices using the prompt.

For details on how to configure a network, refer to the section Network Settings.

Ensure the product and PC are connected to the same network subnet. All IP addresses are made up of four parts separated by dots. (E.g. IP address 111.222.333.444) The product should have the same IP address as the PC, except for the fourth part of the address, if they are connected to the same subnet. (E.g. 111.222.333.*)
When connected to a home network (DLNA)

Play content saved on a device connected to a home network.

- Playing media content using a non-Samsung DLNA server may result in a compatibility issue.
- Playback of some media content shared with a PC or mobile device may not be possible depending on the content encoding type or the content file format. Some functions may not be available.
- Media content may not play properly if there is network congestion. If this is the case, use a USB device.

1. Press **SOURCE** on the remote control. Alternatively, go to **Source** using the OSD menu.

2. Select **Network** from **Source**. The **Network Device** menu appears.

3. Select a device connected via the home network (DLNA). A list of files and folders shared with the selected device will appear.

4. Select media content to play from the list. Play the selected media content.

Features provided in the media content list page

**SOURCE → Source → USB**

The media content list page on a storage device provides the following features.

- **Sort by**
  - Rearrange the media content list under the selected file format in a desired view mode.
  - This menu item is not available if **Filter** is set to **All**.

- **Filter**
  - Among **Photos**, **Videos** and **Music** content saved on a storage device, view content files under a desired file format only.

- **Options**
  - This menu item is not available if **Filter** is set to **All**.

</table>

### Supported Video Formats

- Video content will not play, or not play correctly, if there is an error in the content or the container.
- Sound or video may not work if the contents have a standard bitrate/frame rate above the compatible Frame/sec listed in the table above.
- If the Index Table is in error, the Seek (Jump) function is not supported.
- You may experience file stuttering while playing a video through a network connection.
- The menu may take longer to appear if the video’s bit rate exceeds 10Mbps.
- Some USB/digital camera devices may not be compatible with the player.

### Video Decoder

- Supports up to H.264, Level 4.1
- H.264 FMO / ASO / RS, VC1 SP / MP / AP L4 and AVCHD are not supported.

For all Video codecs except MVC, VP8, VP6:
- Below 1280 x 720: 60 frame max
- Above 1280 x 720: 30 frame max

GMC 2 over is not supported.

Supports only BD MVC Spec.

### Audio Decoder

- Supports up to WMA 10 Pro 5.1 channel.
- WMA lossless audio is not supported.
- QCELP, AMR NB/WB are not supported.

If Vorbis is only in Webm container, supports up to 2 channel.

Requirements Before Contacting Samsung Customer Service Centre

Testing the Product
Check if your product is operating normally by using the product test function.
If the screen remains blank while the power LED blinks even when the product is correctly connected to a PC, perform product testing.

1. Power off both the PC and product.
2. Disconnect all the cables from the product.
3. Power on the product.
4. If No Signal is displayed, the product is operating normally.

Checking the Resolution and Frequency
Not Optimum Mode will briefly be displayed if a mode that exceeds a supported resolution is selected (refer to Supported Resolutions).
Check the followings.

Installation issue (PC mode)

<table>
<thead>
<tr>
<th>The screen keeps switching on and off.</th>
<th>Check the cable connection between the product and PC, and ensure the connection is secure.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blank spaces are found on all four sides of the screen when an HDMI or HDMI-DVI cable is connected to the product and PC.</td>
<td>The blank spaces found on the screen have nothing to do with the product. Blank spaces on the screen are caused by the PC or graphics card. To resolve the problem, adjust the screen size in the HDMI or DVI settings for the graphics card. If the graphics card settings menu does not have an option to adjust the screen size, update the graphics card driver to the latest version. (Please contact the graphics card or computer manufacturer for further details about how to adjust the screen settings.)</td>
</tr>
</tbody>
</table>

| PC is shown in Source when a PC is not connected. | PC is always shown in Source irrespective of whether or not a PC is connected. |

### Sound issue

<table>
<thead>
<tr>
<th>Issue</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>There is no sound.</td>
<td>Check the connection of the audio cable or adjust the volume.</td>
</tr>
<tr>
<td></td>
<td>Check the volume.</td>
</tr>
</tbody>
</table>
Sound issue

The volume is too low.
Adjust the volume.
If the volume is still low after turning it up to the maximum level, adjust the volume on your PC sound card or software programme.

Video is available but there is no sound.
- The OM**D-K model does not have internal speakers. To enable audio, connect an external sound output device to the AUDIO OUT port.
- If an HDMI cable is connected, check the audio output settings on the PC.
  Go to Sound and change Speaker Settings to Internal.
  Applicable to the OM**D-W model only.
- If a source device is used
  • Make sure the audio cable is properly connected to the audio input port on the product.
  • Check the audio output settings for the source device.
    (For example, if an HDMI cable is connected to the monitor, the audio setting for the cable box may need to be changed to HDMI.)
- If a DVI-HDMI cable is used, a separate audio cable is required.
- If the product has a headphone port, make sure nothing is connected to it.
  Reconnect the power cable to the device and then reboot the device.

There is static coming from the speakers.
Check the cable connection. Make sure a video cable is not connected to an audio input port.
Check the signal strength after connecting a cable.
Low signal level can cause corrupted sound.

There is audible sound when the volume is muted.
When Speaker Settings is set to External, the volume button and mute function are disabled.
Adjust the volume for the external speakers.
Audio settings for main speakers are separate from the internal speakers on the product.
Changing or muting the volume on the product does not affect an external amplifier(decoder).
## Sound issue

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sound from the monitor does not change after <strong>Sound Mode</strong> is changed.</td>

</tr>
<tr>
<td>YCbCr output.</td>
<td>player and STB, is connected to the product via an HDMI (RGB signal)</td>
</tr>
<tr>
<td></td>
<td>cable.</td>
</tr>
</tbody>
</table>
Other issue

There is no sound in HDMI mode.

The OM*D-K model does not have internal speakers. To enable audio, connect an external sound output device to the AUDIO OUT port.

Displayed picture colours may not look normal. Video or sound may not be available. This can occur if a source device that only supports an older version of the HDMI standard is connected to the product. If these issues occur, connect an audio cable along with the HDMI cable.

Some PC graphics cards may not automatically recognize HDMI signals that do not include sound. In this case, manually select a sound input.

<table>
<thead>
<tr>
<th>Sound input</th>
<th>Screen mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>PC</td>
<td>Auto</td>
</tr>
<tr>
<td>DVI PC</td>
<td>Audio In (Stereo ports)</td>
</tr>
</tbody>
</table>

Other issue

The IR sensor is not functioning.

Make sure the sensor light turns on when a button is pressed on the remote control.

• If the sensor light does not turn on, turn the power switch off and then on again on the back of the product.
  (The power LED lights up red when the screen is switched off.)
  If the sensor light still does not turn on after the power switch is turned off and then on again, an internal jack may be disconnected.
  Contact your nearest service centre to have the product serviced.

• If the sensor light that is on does not flash red when a button is pressed on the remote control, the IR sensor may be defective.
  Contact your nearest service centre to have the product serviced.

• This function is available only when a source device, such as a DVD player and STB, is connected to the product via an HDMI (RGB signal) cable.

In power-saving mode, when the input source is DisplayPort, PC display settings cannot be saved.

• Go to System → General and set Max. Power Saving to Off. Alternatively, configure the PC display output settings again. Ensure the set is turned on.

When booting the PC with the input source set to DisplayPort, the BIOS and booting screens do not appear.

• Boot the PC when the set is turned on or when the input source is not DisplayPort.
## Q & A

</table>

### Plug-and-Play
This monitor can be installed and used with any Plug-and-Play compatible systems. Two-way data exchange between the monitor and PC system optimizes the monitor settings.
Monitor installation takes place automatically. However, you can customize the installation settings if desired.

### Due to the nature of the manufacturing of this product, approximately 1 pixel per million (1ppm) may appear brighter or darker on the panel. This does not affect product performance.

### This device is a Class A digital apparatus.

- Hereby, Samsung Electronics, declares that this Monitor is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.
- The official Declaration of Conformity may be found at http://www.samsung.com/displaysolutions, go to Support > Search Product Support and enter the model name.
- This equipment may be operated in all EU countries.
**PowerSaver**

The power-saving function of this product reduces power consumption by switching off the screen and changing the colour of the power LED if the product is not used for a specified period of time. The power is not turned off in power-saving mode. To switch the screen back on, press any key on the keyboard or move the mouse. Power-saving mode only functions when the product is connected to a PC with a power-saving function.

* The displayed power consumption level can vary in different operating conditions or when settings are changed.
* SOG(Sync On Green) is not supported.
* To reduce the power consumption to 0, turn off the switch at the back or disconnect the power cord. Disconnect the power cable if you will not be using the product for an extended period of time (during vacation, etc.).
Preset Timing Modes

This product can be set to only one resolution for each screen size to obtain the optimum picture quality due to the nature of the panel. Using a resolution other than the specified resolution may degrade the picture quality. To avoid this, it is recommended that you select the optimum resolution specified for your product.

Check the frequency when you exchange a CDT product (connected to a PC) for an LCD product. If the LCD product does not support 85Hz, change the vertical frequency to 60Hz using the CDT product before you exchange it with the LCD product.

- Horizontal Frequency
  The time required to scan a single line from the left to the right side of the screen is called a horizontal cycle. The reciprocal number of a horizontal cycle is called horizontal frequency. Horizontal frequency is measured in kHz.

- Vertical Frequency
  The product displays a single image multiple times per second (like a fluorescent light) to display what the viewer sees. The rate of a single image being displayed repeatedly per second is called vertical frequency or refresh rate. Vertical frequency is measured in Hz.

Responsibility for the Pay Service (Cost to Customers)

― When the service is requested, in spite of in warranty, we may charge you for a visit from a service technician in the following cases.

Not a product defect

Cleaning of the product, Adjustment, Explanation, Re-installation and etc.
- If a service technician gives instructions on how to use product or simply adjusts options without disassembling product.
- If a defect is caused by external environmental factors (Internet, Antenna, Wired Signal, etc.)
- If a product is reinstalled or devices are connected additionally after installing the purchased product for the first time.
- If a product is reinstalled to move to a different spot or to move to a different house.
- If customer requests instructions on how to use because of another company’s product.
- If customer requests instructions on how to use the network or another company’s programme.
- If customer requests software installation and setup for the product.
- If a service technician removes/cleans dusts or foreign materials inside of the product.
- If customer requests an installation additionally after purchasing a product through home-shopping or online.

A Product damage caused by customer’s fault

Product damage caused by customer’s mishandling or wrong repair
If a product damage is caused by;
- External impact or drop.
- Use of supplies or separately sold product unspecified by Samsung.
- Repair from a person besides an engineer of outsourcing service company or partner of Samsung Electronics Co., Ltd.
- Remodeling or repairing the product by customer.
- Using it with incorrect voltage or non-authorised electrical connections.

Others

- If product fails by natural disaster. (lightning, fire, earthquake, flood damage, etc)
- If consumable components are all used up. (Battery, Toner, Fluorescent lights, Head, Vibrator, Lamp, Filter, Ribbon, etc.)

― If customer requests a service in case the product has no defect, service fee may be charged. So please read User Manual first.
Correct Disposal of This Product (Waste Electrical & Electronic Equipment)

(Applicable in countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal.

Correct disposal of batteries in this product

(Applicable in countries with separate collection systems)

This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste at the end of their working life. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2006/66.

If batteries are not properly disposed of, these substances can cause harm to human health or the environment.

To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.
Optimum Picture Quality and Afterimage Burn-in Prevention

Optimum Picture Quality

- Due to the nature of the manufacturing of this product, approximately 1 pixel per million (1ppm) may be brighter or darker on the panel. This does not affect product performance.
  - The number of sub-pixels by panel type: 6,220,800
- Run Auto Adjustment to improve the picture quality. If noise is still found even after auto adjustment, adjust Coarse or Fine.
- Leaving the screen fixed on a stationary image for an extended period of time may cause afterimage burn-in or defective pixels.
  - Activate power-saving mode or a dynamic screen saver if you will not be using the product for an extended period of time.

Prevention of Afterimage Burn-in

What is afterimage burn-in?

Afterimage burn-in should not occur when the LCD panel is operating normally. Normal operation refers to a continuously changing video pattern. If the LCD panel displays a fixed pattern for an extended period of time (more than 12 hours), a slight voltage difference may occur between the electrodes in pixels that control the liquid crystals.

Such a voltage difference between electrodes increases with time and makes the liquid crystals thinner. When this occurs, a previous image can remain on the screen when the pattern changes. To prevent this, the accumulated voltage difference should be reduced.

Afterimage burn-in should not occur when an LCD panel is operating in proper conditions.
Preventing afterimage burn-in

The best way to protect the product from afterimage burn-in is switching the power off or setting the PC or system to run a screen saver when not in use. Also, Warranty service may be limited depending on instruction guide.

- Powering Off, Screen Saver and Power Saving Mode
  - Power off the product for 2 hours after using it for 12 hours.
  - Go to Display Properties > Power Supply on your PC and set the product to power off as required.
  - Using a screen saver is recommended. It is best to use a single-colour or moving-image screen saver.

- Regular colour Change
  - Use 2 colours
    Switch between 2 colours every 30 minutes as shown above.

- Avoid combinations of a text colour and background colour of contrasting brightness.
  (Brightness: refers to the lightness or darkness of a colour which varies depending on the amount of light emitted)
  - Avoid using grey as it may contribute to afterimage burn-in.
  - Avoid using colours of contrasting brightness (black and white; grey).

- Regular Text colour Change
  - Use bright colours of similar brightness.
    Interval: Change text colour and background colour every 30 minutes
  - Move and change text every 30 minutes as shown below.

- Regularly display a moving image along with a logo.
  Interval: Display a moving image along with a logo for 60 seconds after using for 4 hours.

DivX Certified® to play DivX® video up to HD 1080p, including premium content.
DivX®, DivX Certified® and associated logos are trademarks of Rovi Corporation or its subsidiaries and are used under license.

ABOUT DIVX VIDEO: DivX® is a digital video format created by DivX, LLC, a subsidiary of Rovi Corporation. This is an official DivX Certified® device that has passed rigorous testing to verify that it plays DivX video. Visit divx.com for more information and software tools to convert your files into DivX videos.

ABOUT DIVX VIDEO-ON-DEMAND: This DivX Certified® device must be registered in order to play purchased DivX Video-on-Demand (VOD) movies. To obtain your registration code, locate the DivX VOD section in your device setup menu. Go to vod.divx.com for more information on how to complete your registration.

Covered by one or more of the following U.S. patents: 7,295,673; 7,460,668; 7,515,710; 7,519,274

Open Source Licence Notice
In the case of using open source software, Open Source Licences are available on the product menu. Open Source Licence Notice is written only English.
For information on the Open Source Licence Notice, contact the Samsung Customer Centre or send email to oss.request@samsung.com.
Terminology

480i / 480p / 720p / 1080i / 1080p. Each of the scanning rates above refers to the number of effective scanning lines that decides the screen resolution. The scanning rate may be indicated in i (interlaced) or p (progressive), depending on the scanning method.

- Scanning
  Scanning refers to a process of sending pixels that form an image progressively. A larger number of pixels will deliver a clearer and more vivid picture.
  - Progressive
    In progressive scan mode, all lines of pixels are scanned one by one (progressively) on the screen.
  - Interlaced
    In interlaced scan mode, every other line of pixels is scanned from top to bottom first and then the remaining lines of pixels (that were not scanned) are scanned.

Non-interlace Mode and Interface Mode
Non-interlace mode (progressive scan) displays a horizontal line from the top to the bottom of a screen progressively. Interface mode displays the odd number lines first and the even number lines next. Non-interlace mode is mainly used in monitors as it produces screen clarity and interface mode is mainly used in TVs.

Dot Pitch
The screen consist of red, green and blue dots. A shorter distance between the dots produces a higher resolution. Dot pitch refers to the distance between the shortest distance between dots of the same colour. Dot pitch is measured in millimeters.

Vertical Frequency
The product displays a single image many times per second (like a fluorescent light that flickers) to display an image for a viewer to see. The rate of a single image being displayed repeatedly per second is called vertical frequency or refresh rate. Vertical frequency is measured in Hz. E.g. 60Hz refers to a single image being displayed 60 times in one second.

Horizontal Frequency
The time required to scan a single line from the left to the right side of the screen is called a horizontal cycle. The reciprocal number of a horizontal cycle is called horizontal frequency. Horizontal frequency is measured in kHz.

Source
Input source refers to a video source device connected to the product such as a camcorder or video or DVD player.

Component ports (green, blue and red)
The component ports, which identify, transmit and receive contrast signals, provide superior picture quality to any other video connection methods.

Plug & Play
Plug & Play is a function that allows the automatic exchange of information between a monitor and PC to produce an optimum display environment. The product uses VESA DDC (international standard) to execute Plug & Play.

Resolution
Resolution is the number of horizontal dots (pixels) and vertical dots (pixels) that form a screen. It represents the level of display detail. A higher resolution enables more data to be displayed on the screen and is useful to perform multiple tasks simultaneously.

E.g. A resolution of 1920 X 1080 consists of 1,920 horizontal pixels (horizontal resolution) and 1,080 vertical pixels (vertical resolution).

DVD (Digital Versatile Disc)
DVD refers to a CD-sized mass storage disk where you can save multimedia (audio, video or game) applications using MPEG-2 video compression technology.

HDMI (High Definition Multimedia Interface)
It is an interface that can be connected to a digital audio source as well as a high-definition video source by using a single cable without compression.

Multiple Display Control (MDC)
MDC (Multiple Display Control) is an application that allows multiple display devices to be controlled simultaneously using a PC. Communication between a PC and monitor takes place using RS232C (serial data transmission) and RJ45 (LAN) cables.
