User Manual

WM55R WM65R

The colour and the appearance may differ depending on the product, and the content in the manual is subject to change without prior notice to improve the performance.

Recommended hours of use per day of this product is under 16 hours. If the product is used for longer than 16 hours a day, the warranty may be void.

An administration fee may be charged in the following situations:

(a) An engineer is called out at your request, but it is found that the product has no defect (i.e., where the user manual has not been read).
(b) You bring the unit to a repair centre, but it is found that the product has no defect (i.e., where the user manual has not been read).

You will be informed of the administration fee amount before a technician visits.

Before Using the Product

Safety Precautions

**Warning**
A serious or fatal injury may result if instructions are not followed.

**Caution**
Personal injury or damage to properties may result if instructions are not followed.

Activities marked by this symbol are prohibited.

Instructions marked by this symbol must be followed.

---

Storage

Due to the characteristics of high-glossy products, using a UV humidifier nearby may create white-colored stains on the product.

⤷ Contact Customer Service Centre if the inside of the product needs cleaning (service fee will be charged).

---

Electricity and safety

**Warning**

- Do not use a damaged power cord or plug, or a loose power socket. An electric shock or fire may result.
- Do not use multiple products with a single power socket. Overheated power sockets may cause a fire.
- Do not touch the power plug with wet hands. Otherwise, an electric shock may result.
- Do not bend or pull the power cord with force. Be careful not to leave the power cord under a heavy object. Damage to the cord may result in a fire or electric shock.
- Do not place the power cord or product near heat sources. A fire or electric shock may result.
Insert the power plug all the way in so it is not loose.
An unsecure connection may cause a fire.

Connect the power plug to a grounded power socket (type 1 insulated devices only).
An electric shock or injury may result.

Clean any dust around the pins of the power plug or the power socket with a dry cloth.
A fire may result.

**Caution**

Do not disconnect the power cord while the product is being used.
The product may become damaged by an electric shock.

Only use the power cord provided with your product by Samsung. Do not use the power cord with other products.
A fire or electric shock may result.

Keep the power socket where the power cord is connected unobstructed.
The power cord must be disconnected to cut off power to the product when an issue occurs.

Hold the plug when disconnecting the power cord from the power socket.
An electric shock or fire may result.

---

**Installation**

**Warning**

DO NOT PLACE CANDLES, INSECT REPELLENTS OR CIGARETTES ON TOP OF THE PRODUCT. DO NOT INSTALL THE PRODUCT NEAR HEAT SOURCES.
A fire may result.

Do not install the product in poorly ventilated spaces such as a bookcase or closet.
An increased internal temperature may cause a fire.

Do not install the product on an unstable or vibrating surface (insecure shelf, sloped surface, etc.)
- The product may fall and become damaged and/or cause an injury.
- Using the product in an area with excess vibration may damage the product or cause a fire.

Do not expose the product to direct sunlight, heat, or a hot object such as a stove.
The product lifespan may be reduced or a fire may result.

Do not install the product within the reach of young children.
- The product may fall and injure children.
- As the front is heavy, install the product on a flat and stable surface.

Edible oil, such as soybean oil, can damage or deform the product. Do not install the product in a kitchen or near a kitchen counter.

Have a technician install the wall-mount hanger.
- Installation by an unqualified person can result in an injury.
- Only use approved cabinets.

Install the product at least 10 cm away from the wall to allow ventilation.
An increased internal temperature may cause a fire.
Keep the plastic packaging out of the reach of children. Children may suffocate.

Do not install the product in a vehicle or a place exposed to dust, moisture (water drips, etc.), oil, or smoke. A fire or electric shock may result.

Caution

Do not set down the product on its front. The screen may become damaged.

Do not drop the product while moving. Product failure or personal injury may result.

Set down the product gently. Product failure or personal injury may result.

Installing the product in an unusual place (a place exposed to a lot of fine dust, chemical substances, extreme temperatures or a significant presence of moisture, or a place where the product will operate continuously for an extended period of time) may seriously affect its performance.

Be sure to consult Samsung Customer Service Centre if you want to install the product at such a place.

Operation

Warning

There is a high voltage inside the product. Never disassemble, repair or modify the product yourself.

- A fire or electric shock may result.
- Contact Samsung Customer Service Centre for repairs.

Do not let children hang from the product or climb on top of it. Children may become injured or seriously harmed.

If the product is dropped or the outer case is damaged, turn off the power switch and disconnect the power cord. Then contact Samsung Customer Service Centre. Continued use can result in a fire or electric shock.

Do not leave heavy objects or items that children like (toys, sweets, etc.) on top of the product. The product or heavy objects may fall as children try to reach for the toys or sweets resulting in a serious injury.

Do not move the product by pulling the power cord or any cable. Product failure, an electric shock or fire may result from a damaged cable.

Do not lift or move the product by pulling the power cord or any cable. Product failure, an electric shock or fire may result from a damaged cable.

Ensure the vents are not blocked by tablecloths or curtains. An increased internal temperature may cause a fire.

Do not insert metallic objects (chopsticks, coins, hairpins, etc) or objects that burn easily (paper, matches, etc) into the product (via the vent or input/output ports, etc).

- Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product. Then contact Samsung Customer Service Centre.
- Product failure, an electric shock or fire may result.
Do not place objects containing liquid (vases, pots, bottles, etc) or metallic objects on top of the product.

- Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product. Then contact Samsung Customer Service Centre.
- Product failure, an electric shock or fire may result.

Before moving the product, turn off the power switch and disconnect the power cable and all other connected cables.
Damage to the cord may result in a fire or electric shock.

If the product generates abnormal sounds, a burning smell or smoke, disconnect the power cord immediately and contact Samsung Customer Service Centre.
An electric shock or fire may result.

During a lightning or thunderstorm, power off the product and remove the power cable.
A fire or electric shock may result.

Do not touch the screen when the product has been turned on for an extended period of time as it will become hot.

Do not place heavy objects on the product.
Product failure or personal injury may result.

If a gas leakage is found, do not touch the product or power plug. Also, ventilate the area immediately.
Sparks can cause an explosion or fire.

Do not drop objects on the product or apply impact.
A fire or electric shock may result.

Do not use or keep combustible spray or an inflammable substance near the product.
An explosion or fire may result.

Caution

Do not use humidifiers or stoves around the product.
A fire or electric shock may result.

Do not touch the screen when the product has been turned on for an extended period of time.

Do not place heavy objects on the product.
Product failure or personal injury may result.

Leaving the screen fixed on a stationary image for an extended period of time may cause afterimage burn-in or defective pixels.
Activate power-saving mode or a moving-picture screen saver if you will not be using the product for an extended period of time.

Disconnect the power cord from the power socket if you do not plan on using the product for an extended period of time (vacation, etc).
Dust accumulation combined with heat can cause a fire, electric shock or electric leakage.

Use the product at the recommended resolution and frequency.
Your eyesight may deteriorate.

Looking at the screen too close for an extended period of time can deteriorate your eyesight.

Rest your eyes for more than 5 minutes for every 1 hour of product use.
Eye fatigue will be relieved.

Store small accessories out of the reach of children.
Precautions for Use

Be careful that if you use the supplied pen with a load exceeding 2.5 kg, scratches may occur on the protective glass.

If you use a ballpoint pen other than the supplied pen, be careful that the screen may be stained with ink or damaged.

Do not use a dirty brush to avoid screen damage.

We recommend that you use the supplied pen. Do not use sharp, pointed objects other than the pen.

If dust or dirt from the supplied pen remains on the protective glass, clean it referring to the instructions below.

Cleaning the exterior and display

Wipe the surface with a slightly wet, soft cloth, and then wipe with a dry cloth.
Contact the vendor where you purchased the product if any components are missing.

The appearance of the components may differ from the images shown.

Refer to the installation guide for the WMR stand or wall mount (available for optional purchase).

Checking the Components

|        | 3 You can check the USB device connected to the tray from the PC. |
| TOUCH OUT | Allows touch-based control of the PC screen connected through the HDMI IN 3 port.  
|          | Use a USB cable to connect between the TOUCH OUT port on the tray and the PC. |
| HDMI IN 3 | An HDMI port for displaying input from an external source. |
| SCREEN SHARE | An HDMI port for connecting to an external display. |

- Tag your mobile device to the NFC pad for connection.  
  In writing mode, an NFC tagging can automatically perform Smart View or Screen Mirroring on your mobile device.  
  This function is supported only on Android 8.0 Oreo version or later of Samsung mobile devices.
- Tag an NFC card to the NFC pad to enter an email address automatically.  
  While creating an email, an email address is automatically entered if it is read from the encoded NFC tag.  
  For how to enter an email address in the NFC card, refer to 'Sending Email'.
Before Installing the Product (Installation Guide)

This product can be wall-mounted. The exclusive Samsung stand (for WM55R) and wall mount (for WM65R) are available for optional purchase.

Do not install or use the product with its front facing up. Touch-based functions may not work properly.

WM55R

Rotation

Contact Samsung Customer Service Centre for further details.

• To use the product in landscape mode, turn it anticlockwise and make sure the power indicator is on the right after turning.

Ventilation

Contact Samsung Customer Service Centre for further details.

Installation on a Perpendicular Wall

A Minimum 15 mm
B Ambient temperature: 35 °C or less

When installing the product on a perpendicular wall, allow at least 15 mm of space between the product and wall surface for ventilation and ensure that the ambient temperature is kept below 35 °C.

Installation on an Indented Wall

A Minimum 15 mm
B Minimum 25 mm
C Ambient temperature: 35 °C or less

When installing the product on an indented wall, allow at least the space specified above between the product and wall for ventilation and ensure that the ambient temperature is kept below 35 °C.
WM65R

Ventilation

Contact Samsung Customer Service Centre for further details.

Installation on a Perpendicular Wall

A Minimum 0 mm
B Ambient temperature: 35 °C or less

Installation on an Indented Wall

A Minimum 0 mm
B Minimum 25 mm
C Ambient temperature: 35 °C or less

When installing the product on an indented wall, allow at least the space specified above between the product and wall for ventilation and ensure that the ambient temperature is kept below 35 °C.
Installing the Wall Mount

Installing the Wall Mount

- The wall mount kit allows you to mount the product on the wall.
- For detailed information on installing the wall mount, see the instructions provided with the wall mount.
- We recommend you contact a technician for assistance when installing the wall mount bracket.
- Samsung Electronics is not responsible for any damage to the product or injury to yourself or others if you select to install the wall mount on your own.

Wall Mount Kit Specifications (VESAs)

Install your wall mount on a solid wall perpendicular to the floor. To install the product on the other wall area, contact the nearest agency.
If you install the product on a slanted wall, it may fall and result in severe personal injury.

- Samsung wall mount kits contain a detailed installation manual and all parts necessary for assembly are provided.
- Do not use screws that are longer than the standard length or do not comply with the VESA standard screw specifications. Screws that are too long may cause damage to the inside of the product.
- For wall mounts that do not comply with the VESA standard screw specifications, the length of the screws may differ depending on the wall mount specifications.
- Do not fasten the screws too firmly. This may damage the product or cause the product to fall, leading to personal injury. Samsung is not liable for these kinds of accidents.
- Samsung is not liable for product damage or personal injury when a non-VESA or non-specified wall mount is used or the consumer fails to follow the product installation instructions.
- Always have at least two people mount the product on a wall.
- Standard dimensions for wall mount kits are shown in the table below.

<table>
<thead>
<tr>
<th>Model Name</th>
<th>VESA screw hole specs (A * B) in millimeters</th>
<th>Standard Screw</th>

<tr>
<td>WM65R</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Do not install your Wall Mount Kit while your product is turned on. It may result in personal injury due to electric shock.
Connecting to a network

Network Settings (Wired)

Connecting to a Wired Network

There are three ways to attach your product to your LAN using cable.

- You can attach your product to your LAN by connecting the LAN port on the back of your product to an external modem using a LAN cable. See the diagram below.

- You can attach your product to your LAN by connecting the LAN port on the back of your product to an IP Sharer which is connected to an external modem. Use LAN cable for the connection. See the diagram below.

- Depending on how your network is configured, you may be able to attach your product to your LAN by connecting the LAN port on the back of your product directly to a network wall outlet using a LAN cable. See the diagram below. Note that the wall outlet is attached to a modem or router elsewhere in your house.

If you have a Dynamic Network, you should use an ADSL modem or router that supports the Dynamic Host Configuration Protocol (DHCP). Modems and routers that support DHCP automatically provide the IP address, subnet mask, gateway, and DNS values your product needs to access the internet so you do not have to enter them manually. Most home networks are Dynamic Networks.

Some networks require a Static IP address. If your network requires a Static IP address, you must enter the IP address, subnet mask, gateway, and DNS values manually on your product Cable Setup Screen when you set up the network connection. To get the IP address, subnet mask, gateway, and DNS values, contact your Internet Service Provider (ISP).

If you have a Windows computer, you can also get these values through your computer.

- You can use ADSL modems that support DHCP if your network requires a Static IP address.
- ADSL modems that support DHCP also let you use Static IP addresses.
Set the network connection to use Internet services such as perform software upgrades.

**Automatic Open Network Settings (Wired)**

Connect to the network using a LAN cable.
Make sure a LAN cable is connected first.

**How to set up automatically**

1. Set Network Type to Wired from the Open Network Settings page.
2. The network test screen appears and verifies the network connection.
   
   When the connection has been verified, the "Success! Your device is connected to the Internet. If you have any problems using online services, please contact your Internet service provider." message appears.
   
   - If the connection process fails, check the LAN port connection.
   - If the automatic process cannot find the network connection values or if you want to set the connection manually, go to the next section (Manual Open Network Settings (Wired)).

**Manual Open Network Settings (Wired)**

Offices may use static IP addresses.

If this is the case, ask the network administrator for the IP address, subnet mask, gateway and DNS server address. Enter these values manually.

**Getting the Network Connection Values**

To view the Network connection values on most Windows computers, follow these steps.

1. Right click the Network icon on the bottom right of the screen.
2. In the pop-up menu that appears, click Status.
3. On the dialog that appears, click the Support tab.
4. On the Support Tab, click the Details button. The Network connection values are displayed.

**How to set up manually**

1. Set Network Type to Wired from the Open Network Settings page.
2. The network test screen appears and the verification process starts. Press Cancel. The verification process stops.
4. Select the field at the top and then set IP setting to Enter manually. Repeat the entry process for each field in the IP Address.

   ✅ Setting IP setting to Enter manually automatically changes DNS setting to Enter manually.
5. When done, select OK at the bottom of the page. The network test screen appears and the verification process starts.
6. When the connection has been verified, the "Success! Your device is connected to the Internet. If you have any problems using online services, please contact your Internet service provider." message appears.
Network Settings (Wireless)

Connecting to a Wireless Network

Samsung recommends using IEEE 802.11n. When you play video over a network connection, the video may not play smoothly.

Select a channel for the wireless IP sharer that is not currently being used. If the channel set for the wireless IP sharer is currently being used by another device nearby, this will result in interference and communication failure.

Your product supports only the following wireless network security protocols. If you select the Pure High-throughput (Greenfield) 802.11n mode and the Encryption type is set to WEP, TKIP or TKIP AES (WPS2Mixed) on your AP or wireless router, Samsung products will not support a connection in compliance with new Wi-Fi certification specifications.

If your wireless router supports WPS (Wi-Fi Protected Setup), you can connect to the network via PBC (Push Button Configuration) or PIN (Personal Identification Number). WPS will automatically configure the SSID and WPA key in either mode.

Connection Methods: You can setup the wireless network connection in three ways. Auto Setup (Using the Auto Network Search function), Manual Setup, Use WPS

This product supports Enterprise WPA2 (TLS/TTLS/PEAP).

Automatic Network Setup (Wireless)

Most wireless networks have an optional security system that requires devices that access the network to transmit an encrypted security code called an Access or Security Key. The Security Key is based on a Pass Phrase, typically a word or a series of letters and numbers of a specified length you were asked to enter when you set up security for your wireless network. If you use this method of setting up the network connection, and have a Security Key for your wireless network, you will have to enter the Pass Phrase during the the automatic or manual setup process.

How to set up automatically

1. Set Network Type to Wireless from the Open Network Settings page.
2. The Network function searches for available wireless networks. When done, it displays a list of the available networks.
3. In the list of networks, select a network.
   - If the desired wireless router does not appear, select Refresh to search again.
   - If the router cannot be found after retrying, select the Add Network.
4. If the Enter the password for (AP Name) screen appears, go to step 5. If you select a wireless router that does not have security, go to step 7.
5. If the router has security, enter the (Security key or PIN).
6. When done, select Done. The network connection screen appears and the verification process starts.
   - A connection with the router is established, but the Internet cannot be accessed. In this case, contact your Internet service provider.
7. When the connection has been verified, the “Success! Your device is connected to the Internet. If you have any problems using online services, please contact your Internet service provider.” message appears.
Manual Network Setup (Wireless)

Offices may use static IP addresses.
If this is the case, ask the network administrator for the IP address, subnet mask, gateway and DNS server address. Enter these values manually.

Getting the Network Connection Values
To view the Network connection values on most Windows computers, follow these steps.
1. Right click the Network icon on the bottom right of the screen.
2. In the pop-up menu that appears, click Status.
3. On the dialog that appears, click the Support tab.
4. On the Support Tab, click the Details button. The Network connection values are displayed.

How to set up manually
1. Set Network Type to Wireless from the Open Network Settings page.
2. The Network function searches for available wireless networks. When done, it displays a list of the available networks.
3. In the list of networks, select a network.
   - If the desired wireless router does not appear, select Refresh to search again.
   - If the router cannot be found after retrying, select the Stop button. The Add Network button appears.
4. If the Enter the password for (AP Name) screen appears, go to step 5. If you select a wireless router that does not have security, go to step 7.
5. If the router has security, enter the Enter the password for (AP Name) (Security key or PIN).
6. When done, select Done. The network connection screen appears and the verification process starts.
7. Select Cancel while network connections are being attempted. This will stop the connection.
8. Select IP Settings on network connection screen. The IP Settings screen appears.
9. Select the field at the top and then set IP setting to Enter manually. Repeat the entry process for each field in the IP Address.
   - Setting IP setting to Enter manually automatically changes DNS setting to Enter manually.
10. When done, select OK at the bottom of the page. The network test screen appears and the verification process starts.
11. When the connection has been verified, the “Success! Your device is connected to the Internet. If you have any problems using online services, please contact your Internet service provider.” message appears.
Use WPS

How to set up using Use WPS
If your router has a Use WPS button, follow these steps.

1. Set Network Type to Wireless from the Open Network Settings page.
2. Select Use WPS.
3. Press the WPS or PBC button on your wireless router within the next two minutes. Your product automatically acquires all the network setting values it needs and connects to your network.
4. The network connection screen appears, and network setup is done.
What's a 'Roll'?

- Files are called 'rolls' in this product. A 'roll' is a file with multiple pages linked together.
- A roll can have up to 20 pages linked together.
  - **BRUSH MODE** supports one page only.
- Pages are linked horizontally in landscape orientation, and vertically in portrait orientation.
  - You can open only one roll on one screen. For more information, refer to 'Managing Rolls'.

[Diagram showing landscape orientation and portrait orientation with linked pages]

ROLL EXPLORER

Open, browse and manage rolls via the Rolls explorer.

Parts Description

1. All
   You can view the list by the mode you want.
   • All / Pen Mode / Brush Mode

2. By name ↔ By date
   Set the sort order of files.

3. Select
   Select multiple rolls to export or delete.

4. File name
   Rename the file.

5. Rolls
   Browse and open a desired roll.

To open a locked roll, press the six-digit password.

The rolls are sorted by recent date.

Deleting / Exporting rolls

You can select multiple rolls to export or delete.

Parts Description

1. Export
   Share the selected rolls any way you like.
   • Email / USB / Network Drive

2. Delete
   Delete the selected rolls.

3. Cancel
   Deselect the roll.
Page Viewer

You can move or edit the created rolls for each page.

Page viewer area

This menu is only visible in PEN MODE mode.

| 3     |             | Delete the focused page. |
| 4     | +           | Add a new page to the focused position.  
|       |             | You can create up to 20 pages per roll. |
Note On/Off

Add a layer over the screen to write or draw on. This can be useful for adding note to content from an external source.

This menu is only visible in PEN MODE mode.

1. Tap 📝 to add a new note layer over the screen.
2. Take note on the layer.
3. Tap 🗑️ and close.

- Save / Don't Save / Cancel
Using the Selection Tools

Select and edit / capture / email / print the pen or brush content. Use to move, rotate, or resize the selection.

Capture / email / print

1. Tap in the screen bottom. A select box appears on the screen.
   - Drag the of the select box to adjust the size.
2. Select the area and choose from / / options.
   - The product must be connected to a network to use the email or print option.

Editing pen and brush content

- The changes apply to pen and brush content only.
1. Tap in the screen bottom. A select box appears on the screen.
   - Drag the of the select box to adjust the size.
2. Tap to enable editing for the selected area.
3. Move, rotate or resize the selected area and tap .
   - Tap to abort the changes.
You can view the screen of a mobile device or PC connected to the product, or import data such as images from a connected USB or network drive.

- Touch **IMPORT** at the top of the screen to select the desired device.

- The native FLIP format (.iwb) refers to files that are directly saved from the device and only supported by FLIP devices.
- Supported video file formats: avi, mkv, asf, .mp4, mov, 3gp, vro, mpg, mpeg, ts, tp, trp, flv, vob, svi, m2ts, mts, .webm, .rmvb
- Supportable image file formats: JPG, BMP, PNG, MPO
- Supported document file formats: DOC, PPT, PDF, XLS, XLSX
Connecting to a Mobile Device

Connecting using Smart View or Screen Mirroring

1. Drag down the top bar on the mobile device screen to start **Smart View** or **Screen Mirroring**.
2. Select this product from the list of devices displayed on the screen. 
   - The initial device name is **[FLIP] Samsung WMR Series**.
   - You can control the mobile device from the product screen.
   - HDCP (High-bandwidth Digital Content Protection) contents will not show on the screen if **PIP Capture** is set to On.

Connecting using NFC tagging

- This feature is only available when the product is equipped with a tray (optional purchase).
- This function is supported only on **Android 8.0 Oreo** version or later of Samsung mobile devices.
- In writing mode, an NFC tagging can automatically perform **Smart View** or **Screen Mirroring** on your mobile device.

1. Turn on the NFC feature on a supported mobile device.
2. Tag the mobile device to the NFC pad.
   - You can control the mobile device from the product screen.
Connecting to a PC

Connecting using a cable

1. Connect the product to the PC using an HDMI cable.

- HDCP contents will not show on the screen if PIP Capture is set to On.

2. Select IMPORT → PC → HDMI from the top of the screen.

3. To control the PC from the product screen, connect the supplied USB cable to the TOUCH OUT port on the product.

- If used in a multi-screen setup, make sure you have configured FLIP as the main display.

Connecting via the WiFi Display function

- This function is only available for the PC that support the WiFi Display function.

1. Select Action Center or Devices in the taskbar notification area of the PC.

2. Click Connect or Project and select a [Flip] Samsung WMR Series device to complete the connection.

- The connection procedure may vary depending on the PC.

- After the WiFi Display connection is made, you can control the PC screen from the product screen.

- This function is only supported by Windows 10.
Importing from a USB Device

Connect an external HDD or a USB storage device.

- Import videos, images, native FLIP files (.iwb), or document files.

Connecting to Internet

Connect the network to access the Internet from the product like accessing the Internet from a computer.

- Capture, reposition, or see the browser window in full screen view.

Connecting to SAMSUNG WORKSPACE

Access to remote PC and your work resources with this function.

- **REMOTE PC:** This function allows you to connect your product to a remote PC or a cloud server.
  - Only PCs or Cloud Servers running on macOS/Windows 7 Pro or newer are supported.
- **NETWORK DRIVE:** Connect the network drive to bring files.
  - You can register a network drive while the network is connected.
  - For information about how to connect to a network, see 'Connecting to a network'.
  - You can register a network drive account at ⌚️ → SETTINGS → Connect → Advanced Settings → Network Drive → Add Account.
  - To register a network drive account, you must enter the Address, Username, and Password.
  - To register your network drive account, refer to Add Account for Network Drive.
  - Import videos, images, native FLIP files (.iwb), or document files.
- **Office 365:** Provides access to Office 365 features from Microsoft.
- **VMware:** Enterprise customers who won VMware Infrastructure can access VMware.
When you connect a PC or a mobile device to the product, the source window appears.

Sending Email

EXPORT → EMAIL

To send your created rolls via email, first register your email account.

You can register your email account at SETTINGS → Connect → Advanced Settings → Email.

If you set Sender Authentication to Personal Account at SETTINGS → Connect → Advanced Settings → Email, you must authenticate your account each time you send an email. See below.

– You can send emails when Sender Authentication is set to Personal Account as long as you have an account on that mail server (SMTP Server Name and SMTP Port Number).
Note that it requires the sender to provide the SMTP account ID and password, as well as the sender address for every email.

– If you set Sender Authentication to Default Account, you can use the SMTP ID and password you saved to Default Account to send emails. (The sender address is usually identical to the SMTP ID, with some exceptions depending on the SMTP server.)

– For the SMTP information required to register a mail server, contact your mail server administrator.

Files saved as dedicated files are converted to PDF files and sent.

Parts | Description
--- | ---
1 To | Enter the recipient’s email address.
   - Press and type text by using the virtual keyboard.
   - Press on the virtual keyboard to enter text by handwriting.
   - Search recipient in Local Address Book or LDAP server.
   - Equip the product with a tray (optional purchase) to automatically enter the address by tagging an NFC card or sticker containing the information.
     - : Explains where to tag the NFC card.
     - Using the NFC Writing App in mobile device or PC, etc, register an email address with the NDEF Standard <Text> Record Type to an NFC Forum Type 2 Card sold on the market.

2 Subject | The email subject is automatically set to the device name and the current date.

3 Send | Send the email.

4 Change the page view mode for the roll to send.

5 Select the pages to send.
Printing

To print, you must set up the Print Server and the Clock Set.

To set up the Print Server, the product and the printer you want and your PC must be connected to the same network.

Flip Printing Software must be also installed on the PC connected.

- For information about how to connect to a network, see 'Connecting to a network'.
- You can set up the Print Server at → SETTINGS → Connect → Advanced Settings → Print Server.
- You can set Clock Set at → SETTINGS → System → Time → Clock Set.
- The Flip Printing Software is available on the website
  – http://displayolutions.samsung.com
  – http://www.samsung.com
- Devices that transfer files, such as virtual printers (PDF, XPS, One note, etc.) or fax machines, are not supported, but only printers that can print actual paper are supported.
- For print paper size, only A4 is supported.

Installing Flip Printing Software

Follow the onscreen instructions to install Flip Printing Software.

- The installation takes about 10 minutes, and the time taken may vary depending on your PC environment.

PC installation requirements

- Supported operating systems:
  Windows 7(32/64 bit), Windows 10(32/64 bit), MAC
- When installing the software, make sure that critical Windows updates are already installed. Update Windows to the latest version before beginning the setup.
- For Windows 7, make sure that Service Pack 1 is already installed.

Setting up the printer

After the Flip Printing Software is installed, make the following settings on the product onscreen menu.

Setting up automatically

1. Select → SETTINGS → Connect → Advanced Settings menu.
2. Select Print Server → Connect to Server → Auto.

Setting up manually

1. Select → SETTINGS → Connect → Advanced Settings menu.
2. Select Print Server → Connect to Server → Manual, and then enter the Server IP address of the PC where Flip Printing Software is installed.
**Parts** | **Description**
---|---
1. Printer | Displays a list of connected printers. Select a printer to print the roll with.
2. Copies | Set the number of prints.
3. Print preview area | Preview the roll to print.
4. Print | Start the printing.
5. Colour Mode | Select the colour to print the roll with.
6. Change the page view mode of the roll to print.
7. Select the pages to print.
Exporting to a USB Device

Connect an external HDD or a USB storage device.

Your device saves files in two versions (IWB and PDF formats).
Sharing your screen

EXPORT → SCREEN SHARE

Connecting with HDMI cables

1. Use an HDMI cable to connect the PC to the HDMI IN port on the product or tray (optional purchase).
2. Use an HDMI cable to connect the display to the SCREEN SHARE port.
3. From the top of the screen, select EXPORT → SCREEN SHARE → Wired.
   
   - If the PC is connected to the HDMI IN 3 port on a tray (optional purchase) without setting it, the PC screen is shared on the display instead.
4. The screen is shared on the display.

   - This option supports UHD (50 Hz / 60 Hz) and FHD (50 Hz / 60 Hz) only.
   - The screen may blink once or twice upon when connecting for the first time or when there is a change in the WMR product or source state.

Connecting wirelessly

From the top of the screen, select EXPORT → SCREEN SHARE → Wireless and then the device to share the screen with.

- SCREEN SHARE feature works best when using FLIP in landscape orientation.
- Devices must support Screen Mirroring in order to use SCREEN SHARE with.

<table>

Exporting from a Network Drive

Connect the network drive to save files.

⚠ You can register a network drive while the network is connected.
For information about how to connect to a network, see 'Connecting to a network'.

⚠ You can register a network drive account at 🔄 SETTINGS → Connect → Advanced Settings → Network Drive → Add Account.
To register a network drive account, you must enter the Address, Username, and Password.
To register your network drive account, refer to 'Add Account' for Network Drive.

⚠ Your device saves files in two versions (IWB and PDF formats).

Sending to a mobile device

Export → Mobile

View the screen of the product from a mobile device.

⚠ Sharing is only available for rolls at the moment.

Download Samba client to your mobile device and enter the following information which can be found on the product screen.

- Wi-Fi Name, Wi-Fi Password, Server IP address

Importing Local Address Book contacts

To use FLIP Local Address Book, first Import contacts from a CSV file using a USB device.

1 Use LDAP: Set Don't Use.
   - → SETTINGS → Connect → Advanced Settings → Enter password → LDAP → Set LDAP Connection → Use LDAP → Don't Use

2 Set up details under Email menu.
   - → SETTINGS → Connect → Advanced Settings → Enter password → Email

3 Edit and save your Local Address Book to a USB device.
   Make a list of contacts in the following structure and save it to the root directory as RecentSearchList.csv.
   - RecentSearchList.csv structure (example)
     
     | emailid1@samsung.com | Name1 | Level1 | Team1 | Company1 |
     |----------------------|-------|--------|-------|----------|
     | emailid2@samsung.com | Name2 | Level2 | Team2 | Company2 |
     | emailid3@samsung.com | Name3 | Level3 | Team3 | Company3 |

4 Connect the USB device to FLIP to import contacts.
   - → SETTINGS → Connect → Advanced Settings → Enter password → Email → Local Address Book → Import

   - The USB device and its contents may not be detected properly if a USB extension cable is used. (USB hubs are not supported.)
   - Do not remove the USB device while loading.
   - If more than two USB devices are connected, some of them may not be detected.
   - USB devices that require higher operating power need to be connected to the USB (1.0A) port on the back.
   - The file system supports FAT, exFAT, and NTFS formats.

Using Local Address Book contacts

Automatically search and suggest from the list of contacts when selecting recipient(s) in EXPORT → EMAIL.
   - To use this function, complete setting details under Email menu.

Deleting Local Address Book contacts

- → SETTINGS → Connect → Advanced Settings → Enter password → Email → Local Address Book → Delete

How to create a text file for use of LDAP

The LDAP configuration basically consists of many long sentences. During LDAP configuration, FLIP can be fetched using the text file to prevent typos and make a batch setting.

- Input of file name and content should be case sensitive for correct operation.

- Format of LDAPConnectionConfig.txt

  (1) Example of the text file
  
  User ID=cn=Manager, dc=example, dc=com
  Server Address=123.456.789.012
  Server Port Number=12345
  Base DN=dc=samsung, dc=example, dc=com
  SSL/TLS=Don't Use
  Use Untrusted Certificates=Don't Use
  Authentication Type=Basic
  Kerberos Realm=MYLDAP.COM
  KDC Host=krb1.myldap.com
  KDC Port=88

  (2) Allocation of values (VAL) for each key
  
  User ID: Enter the User ID.
  Server Address: Enter the IP or URL of the LDAP server.
  Server Port Number: Enter the Port of the LDAP server.
  SSL/TLS: Enter Use or Don't Use.
  Use Untrusted Certificates: Enter Use or Don't Use.
  Authentication Type: Enter Basic or Anonymous.
  - The following three items will be added if you select Kerberos type verification.
    Kerberos Realm: Fill in the Kerberos field (Example: MYLDAP.LDAP)
    KDC Host: Enter the KDC Host URL (Example: krb1.myldap.com)
    KDC Port: Enter the KDC Host Port (Example: 88)
  
  If you select to use Kerberos type verification, use the original Kerberos User ID for a User ID instead of User ID in DN(Distinguished Name) format. (Example: Mirko)
• Format of LDAPQuery.txt

(1) Example of the text file
   UID=uid
   Email=mail
   Name=cn
   Last Name=sn
   Position=title
   Company Name=o
   Department=departmentNumber
   Query=((mail=*<A>*)(cn=*<A>*))

(2) Allocation of values (VAL) for each key

1) Mapping part (all rows except the last)
   - Includes all rows except the last, in the order of UID, Email, Name, Last Name, Position, Company name, and Department.
   - Values are mapped in the following manner.
     - On the left of "=" syntax is the name that is seen in the LDAP Query Configuration menu (also on the left) and mapped to the values on the right side of "=" (the actual LDAP Server attributes).
     - You can choose attributes to change values. For instance, you can change the right-side values without changing the left-side values.

2) Query part
   - <A> is the Keyword that is used for a Search.
   - The syntax for the Use Custom Query complies with the LDAP Query rule excluding <A>.
     - For example, when <A> is included in the mail or cn attribute, you can create it as follows.
     - Query=((mail=*<A>*)(cn=*<A>*))

- **Backlight**
  Adjust backlight brightness to your preference. 100 is the brightest setting.

- **Colour Temperature**
  It sets colour temperature. The value and temperature increase simultaneously, so the ratio of blue colour rises.
  (Range: 2800K - 16000K)

- **White Balance**
  Adjust the colour temperature of the picture so that white objects appear brighter.

- **Input Signal Plus**
  Expands the input signal range for HDMI connections.
  Supports resolutions up to 3840 x 2160 @ 60 Hz with **Input Signal Plus** expansion set to **On**.
  Supports resolutions up to 3840 x 2160 @ 30 Hz with **Input Signal Plus** expansion set to **Off**.

## Problems and Solutions

**Source window (HDMI) issue**

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blank spaces are found on all four sides of the screen when an HDMI cable is connected to the product and PC.</td>
<td>The blank spaces found on the screen have nothing to do with the product. If the blank spaces on the screen are caused by the PC or graphics card. To resolve the problem, adjust the screen size in the HDMI settings for the graphics card. If the graphics card settings menu does not have an option to adjust the screen size, update the graphics card driver to the latest version. (Please contact the graphics card or computer manufacturer for further details about how to adjust the screen settings.)</td>
</tr>
<tr>
<td>The images on the screen look distorted.</td>
<td>Check the cable connection to the product.</td>
</tr>
<tr>
<td>The screen is not clear. The screen is blurry.</td>
<td>Set the resolution and frequency to the recommended level.</td>
</tr>
<tr>
<td>The screen appears unstable and shaky.</td>
<td>Check that the resolution and frequency of the PC and graphics card are set within a range compatible with the product. Then, change the screen settings if required by referring to 'Preset Timing Modes'.</td>
</tr>
<tr>
<td>There are shadows or ghost images left on the screen.</td>
<td></td>
</tr>
<tr>
<td>Source window (HDMI) issue</td>
<td></td>
</tr>
<tr>
<td>----------------------------------------------------------------</td>
<td>----------------------------------------------------------------</td>
</tr>
<tr>
<td>White does not really look white.</td>
<td>Go to Picture and adjust the White Balance settings.</td>
</tr>
<tr>
<td>The product will turn off automatically.</td>
<td>Make sure the power cable is connected properly to the product and power outlet.</td>
</tr>
<tr>
<td>The screen display does not look normal.</td>
<td>Encoded video content may cause the display to appear corrupted in scenes featuring fast moving objects such as in a sports event or action video. Low signal level or low picture quality may cause the display to appear corrupted. This does not mean the product is defective. A mobile device within a distance of one-meter radius may cause static on analogue and digital products.</td>
</tr>
<tr>
<td>The brightness and colour do not look normal.</td>
<td>From the menu, select 📲 → SETTINGS → Support → Reset All to try resetting the screen.</td>
</tr>
<tr>
<td>The display looks unstable and then freezes.</td>
<td>The screen may freeze when a resolution other than the recommended resolution is used or if the signal is not stable. To resolve the issue, change the PC resolution to the recommended resolution.</td>
</tr>
<tr>
<td>The screen cannot be displayed in full screen.</td>
<td>If the source window is set to full screen mode while in portrait orientation, a black bar appears at both the top and bottom. Change to landscape orientation, and then switch the Source window to full screen mode.</td>

</table>
### Touch function issues

<table>
<thead>
<tr>
<th>Issue</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The icons can be touched but the drawings cannot.</td>
<td>Use the provided product-specific pen.</td>
</tr>
<tr>
<td>Touching does not work when HDMI connection is used.</td>
<td>Check whether the TOUCH OUT port on the product is connected to a USB port on the PC using a USB cable.</td>
</tr>
<tr>
<td></td>
<td>• HDMI IN 1 or HDMI IN 2 → TOUCH OUT on the rear of the product</td>
</tr>
<tr>
<td></td>
<td>• HDMI IN 3 → TOUCH OUT on the tray</td>
</tr>
<tr>
<td>I use two pens, but they do not work well.</td>
<td>Make sure that there is enough space between the two pens at multi-touching.</td>
</tr>
<tr>
<td>Touches break, reaction speed gets slow, and so on.</td>
<td>Make sure that there are no foreign substances on the screen surface.</td>
</tr>
<tr>
<td></td>
<td>Check whether the screen is broken.</td>
</tr>
<tr>
<td></td>
<td>Make sure that the product is not exposed to direct sunlight.</td>
</tr>
</tbody>
</table>
### Other issue

<table>
<thead>
<tr>
<th>Issue</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>The product smells like plastic.</td>
<td>The plastic smell is normal and disappears over time.</td>
</tr>
<tr>
<td>Small particles are found on the edges of the product.</td>
<td>The particles are part of the product design. The product is not defective.</td>
</tr>
<tr>
<td>When I try to change the PC resolution, a message &quot;The defined resolution is not supported.&quot; appears.</td>
<td>The message &quot;The defined resolution is not supported.&quot; appears if the input source resolution exceeds the maximum resolution of the product. To resolve the issue, change the PC resolution to a resolution supported on the product.</td>
</tr>
<tr>
<td>There is no sound from the speakers in HDMI mode when a DVI-HDMI cable is connected.</td>
<td>DVI cables do not transmit sound data.</td>
</tr>
<tr>
<td><strong>HDMI Black Level</strong> is not functioning properly on an HDMI device with YCbCr output.</td>
<td>This function works only when the HDMI signal of the external device is RGB output.</td>
</tr>
<tr>
<td>There is no sound in HDMI mode.</td>
<td>Displayed picture colours may not look normal. Video or sound may not be available. This can occur if a source device that only supports an older version of the HDMI standard is connected to the product.</td>
</tr>
</tbody>
</table>
## General

**Horizontal Frequency**  
The time required to scan a single line from the left to the right side of the screen is called a horizontal cycle. The reciprocal number of a horizontal cycle is called horizontal frequency. Horizontal frequency is measured in kHz.

**Vertical Frequency**  
The product displays a single image multiple times per second (like a fluorescent light) to display what the viewer sees. The rate of a single image being displayed repeatedly per second is called vertical frequency or refresh rate. Vertical frequency is measured in Hz.

</tbody>
</table>
Due to the nature of the manufacturing of this product, approximately 1 pixel per million (1ppm) may appear brighter or darker on the panel. This does not affect product performance.

This product can be set to only one resolution for each screen size to obtain the optimum picture quality due to the nature of the panel. Using a resolution other than the specified resolution may degrade the picture quality. To avoid this, it is recommended that you select the optimum resolution specified for your product.

For detailed device specifications, visit the Samsung Electronics website.
Preset Timing Modes

The screen will automatically be adjusted if a signal that belongs to the following standard signal modes is transmitted from your PC. If the signals transmitted from the PC differ from the standard mode, the screen may not be displayed. In such a case, change the settings as shown in the following table by referring to the graphics card user manual.

Responsibility for the Pay Service (Cost to Customers)

When the service is requested, in spite of in warranty, we may charge you for a visit from a service technician in the following cases.

Not a product defect

Cleaning of the product, Adjustment, Explanation, Re-installation and etc.
- If a service technician is requested to give instructions on how to use product or simply adjusts options without disassembling product.
- If a defect is caused by external environmental factors (Internet, Antenna, Wired Signal, etc.)
- If a product is reinstalled or devices are connected additionally after installing the purchased product for the first time.
- If a product is reinstalled to move to a different spot or to move to a different house.
- If the customer requests instructions on how to use another company's product.
- If customer requests instructions on how to use the network or another company’s programme.
- If customer requests software installation and setup for the product.
- If a service technician removes/cleans dusts or foreign materials inside of the product.
- If customer requests an installation additionally after purchasing a product through home-shopping or online.

A Product damage caused by customer's fault

Product damage caused by customer's mishandling or wrong repair
If a product damage is caused by;
- External impact or drop.
- Use of supplies or separately sold product unspecified by Samsung.
- Repair from a person besides an engineer of outsourcing service company or partner of Samsung Electronics Co., Ltd.
- Remodeling or repairing the product by customer.
- Using it with incorrect voltage or non-authorized electrical connections.
- Not following the "cautions" in User Manual.

Others

- If product fails by natural disaster. (lightning, fire, earthquake, flood damage, etc)
- If consumable components are all used up. (Battery, Toner, Fluorescent lights, Head, Vibrator, Lamp, Filter, Ribbon, etc.)
- If customer requests a service in case the product has no defect, service fee may be charged. So please read User Manual first.
Prevention of Afterimage Burn-in

What is afterimage burn-in?
Afterimage burn-in should not occur when the panel is operating normally. Normal operation refers to a continuously changing video pattern. If the panel displays a fixed pattern for an extended period of time a slight voltage difference may occur between the electrodes in pixels that control the liquid crystals. Such a voltage difference between electrodes increases with time and makes the liquid crystals thinner. When this occurs, a previous image can remain on the screen when the pattern changes.

⚠️ This information is a guide to prevent afterimage burn-in. Viewing a fixed screen for an extended period of time may cause afterimage burn-in. This problem is not included in warranty.

Recommended prevention practices
Viewing a fixed screen for an extended period of time may cause afterimage burn-ins or smudges. Turn off the product when it is not used for a long time, activate the Power Saving mode, or run a moving screen saver.
